GRSG, at its ninety-third session, agreed to recommend for adoption by AC.3 a draft gtr on Safety Glazing (ECE/TRANS/WP.29/GRSG/2007/28, as modified by GRSG-93-24).

The head-form test and two paragraphs concerning markings were left in square brackets for policy decision by AC.3. Informal document WP.29-143-05 proposes a solution for the head-form test.

Concerning the markings, AC.3 proposes the deletion of the paragraphs, which were left in square brackets by GRSG. The markings paragraphs are reproduced below:

"4.1. Markings

4.1.1. General requirements for markings.

4.1.1.1. All marking shall be clearly legible from at least one side of the glazing, indelible, and at least 3 mm in height.

4.1.1.2. Every glazing shall bear the following markings: Global glazing manufacturer identification mark, gtr mark, identification mark(s).

4.1.1.3. Contracting Parties may require additional markings.

4.1.2. Identification marks.
Each piece of glazing shall bear the appropriate marks set out in this section.

..."
