(a) maximum intensity;  
(b) minimum intensity if one lamp has failed.

6.4. ~~If a single lamp contains more than one light source~~ **In case of failure of single lamp of categories 1, 1a, 1b, 2a and 2b**, the following provisions shall apply:

6.4.1. ~~All light sources which are connected in series are considered to be one light source.~~ **A group of light sources, wired so that the failure of any one of them causes all of them to stop emitting light, shall be considered to be one light source.**

~~6.4.2. The direction indicator lamp shall comply with the minimum intensity required when any one light source has failed.~~
