

#### **A. Proposed amendments to ECE/TRANS/WP.29/GRE/2008/21**

The modifications are marked in **bold** or ~~strikethrough~~ characters.

Paragraphs 5.23., amend to read:

"5.23. Lamps shall be fitted in a vehicle in such a way that the light source can be ~~simply and~~ correctly replaced ~~at the roadside~~ without the need for special tools, other than those provided with the vehicle by the manufacturer. **The vehicle manufacturer handbook shall provide to the users a detailed description of the procedure for replacement.** This requirement is not applicable to:

(a) devices approved with a non-replaceable light source;

(b) devices approved with light sources according to Regulation No. 99."

#### **B. Justification**

It is difficult to define "simply" for the replacement of the light source and it does not seem necessary to clarify the place where it takes place; the handbook is something quite easily provided by a car manufacturer but not by a trailer manufacturers or body manufacturers.
