

Proposal from India for a draft amendment to Regulations Nos. 13 and 13-H (Braking)

Comments on ECE/TRANS/WP.29/GRRF/2008/2

A. PROPOSAL

Note under paragraph 2.4.3. of the EC proposal on ECE/TRANS/WP.29/GRRF/2008/2, may be reworded as below:

"Note: For vehicles equipped with a brake system assisted by an external energy source, the applied pedal force necessary depends on the energy level that exists in the energy storage device. Therefore, sufficient energy level shall be ensured at the beginning of the test."

B. JUSTIFICATION

This proposal would extend the test method for all types of energy sources like vacuum, pneumatic etc., and should not be limited to vacuum boosters.
