Belgian comments on document UN/SCETDG/36/INF.14 of Germany

Introduction

1. Belgium agrees with the principle, set out in document UN/SCETDG/36/INF.14 of Germany. The proposed text, however, needs editorial improvement.

Proposal

2. Insert the following requirement in 6.2.2.5.4.9 (before the last sentence) :

"A reservation shall be included in the certificate if it was not possible to investigate exhaustively the compatibility of the construction materials of the pressure receptacle with the contents it will be used for, when the type approval was issued."
