REGULATION No. 7

A. PROPOSAL

Paragraphs 2.1.4. amend to read:

"2.1.4. Whether the device produces steady luminous intensity (category R, R1, RM1, S1 or S3) or variable luminous intensity (category R2, RM2, S2 or S4)."

Paragraphs 4.2.2.3. and 4.2.2.4. amend to read:

"4.2.2.3. On devices meeting the requirements of this Regulation in respect of the front end-outline marker lamps, the letters "AM";

4.2.2.4. On devices meeting the requirements of this Regulation in respect of the rear end-outline marker lamps, the letters "RM" followed by the figure "1" when the device produces steady luminous intensity and by the figure "2" when the device produces variable luminous intensity;"

Paragraphs 4.2.2.3. to 4.2.2.7. (former), renumber as paragraphs 4.2.2.5. to 4.2.2.9.

Paragraph 4.2.2.7. (new), amend to read:

"4.2.2.7. On front or rear position lamps of which the visibility angles are asymmetrical with regard to the reference axis in a horizontal direction and on front or rear end-outline marker lamps, a horizontal arrow pointing towards the side on which the photometric specifications are met up to an angle of 80° H; "

Paragraph 4.3.1. amend to read:

"4.3.1. Independent lamps
Annex 3, paragraphs 1 to 6, gives examples of the approval mark with the above mentioned additional symbols."

Paragraph 4.3.15. amend to read:

"4.3.1.5 Example 7 of Annex 3 to this Regulation gives examples of an approval mark with the above-mentioned additional symbols."
Paragraph 4.3.2.5, amend to read:

"4.3.2.5 Paragraph 8 of Annex 3 to this Regulation gives examples of approval marks for grouped, combined or reciprocally incorporated lamps with all the above mentioned additional symbols."

Paragraph 4.3.3.2, amend to read:

"4.3.3.2 Paragraph 9 of Annex 3 to this Regulation gives examples of approval marks relating to lamps which are reciprocally incorporated with a headlamp."

Paragraphs 5.8 and 5.9, amend to read:

"5.8. In case of failure of the variable intensity control of:
(a) a rear position lamp category R2 emitting more than the maximum value of category R or R1;
(b) a rear end-outline marker lamp category RM2 emitting more than the maximum value of category RM1;
(c) a stop lamp category S2 emitting more than the maximum value of category S1;
(d) a stop lamp category S4 emitting more than the maximum value of category S3
requirements of steady luminous intensity of the respective category shall be fulfilled automatically.

5.9 In the case of replaceable filament lamp(s):

5.9.1. Any category or categories of filament lamp(s) approved according to Regulation No. 37 may be used, provided that no restriction on the use is made in Regulation No. 37 and its series of amendments in force at the time of application for type approval.

5.9.2. The design of the device shall be such that the filament lamp can be fixed in no other position but the correct one.

5.9.3. The filament lamp holder shall conform to the characteristics given in IEC Publication 60061. The holder data sheet relevant to the category of filament lamp used, applies."
Paragraph 6.1., amend to read:

"6.1. The light emitted by each of the two devices supplied shall be in the reference axis, of not less than the minimum intensity and of not more than the maximum intensity specified below:

<table>

</table>

6.1.5. (…)

Paragraph 6.4., amend to read:

"6.4. In the case of devices of categories R2, RM2, S2 and S4 the time that elapses between energising the light source(s) and the light output measured on the reference axis to reach 90 per cent of the value measured in accordance with paragraph 6.3. above shall be measured for the extreme levels of luminous intensity produced by the device. The time measured to obtain the lowest luminous intensity shall not exceed the time measured to obtain the highest luminous intensity."
Paragraph 8. amend to read:

"8. COLOUR OF LIGHT EMITTED

The colour of the light emitted inside the field of the light distribution grid defined in paragraph 2 of Annex 4 shall be red or white. For testing see Annex 5 to this Regulation. Outside this field, no sharp variation of colour shall be observed.

These requirements shall also apply within the range of variable luminous intensity produced by:
(a) rear position lamps of category R2;
(b) rear end-outline marker lamps of category RM2;
(c) stop lamps of categories S2 and S4"

Annex 1, amend to read:

"FRONT AND REAR POSITION LAMPS, END-OUTLINE MARKER LAMPS AND STOP-LAMPS: MINIMUM ANGLES REQUIRED FOR LIGHT DISTRIBUTION IN SPACE OF THESE LAMPS

In all cases, the minimum vertical angles of light distribution in space are 15° above and 15° below the horizontal for all categories of devices included in this Regulation, except:

(a) for lamps with a permissible mounting height \( \leq 750 \) mm above the ground, for which they are 15° above and 5° below the horizontal;

(b) for category S3 or S4 stop lamp for which they are 10° above and 5° below the horizontal;

\( ^{1/} \) The angles shown in these diagrams are correct for devices to be mounted on the right side of the vehicle. The arrows point to the front of the vehicle.
Minimum horizontal angles of light distribution in space

Front position lamps,
End outline marker lamps
On and above the H plane for all lamps,
Under the H plane for lamps intended for M2, M3, N2 or N3 category vehicles.

H plane: "horizontal plane going through the reference centre of the lamp"
Front End-outline marker lamp (AM)

Rear End-outline marker lamp (RM1, RM2)

Rear position lamps, end-outline marker lamps
Annex 3 paragraphs 3 and 4, amend to read:

"3. **Front End-outline marker lamp**

![Approval Mark]

The device bearing the approval mark shown above is a front end-outline marker lamp approved in France (E2) under approval number 125 pursuant to Regulation No. 7.

The number mentioned below the symbol "AM" indicates that approval was granted in conformity with the requirements of Regulation No. 7 as amended by the 02 series of amendments. The horizontal arrow indicates the side on which the required photometric specifications are met up to an angle of 80° H.

4. **Rear End-outline marker lamp**

![Approval Mark]

The device bearing the approval mark shown above is a rear end-outline marker lamp with variable luminous intensity approved in Italy (E3) under approval number 122 pursuant to Regulation No. 7.

The number mentioned below the symbol "RM" indicates that approval was granted in conformity with the requirements of Regulation No. 7 as amended by the 02 series of amendments. The horizontal arrow indicates the side on which the required photometric specifications are met up to an angle of 80° H."

Annex 3 Paragraphs 3 to 8 (former), renumber as paragraphs 5 to 10.
B. JUSTIFICATION

This proposal aims at insuring consistency between Reg. n°7 and Reg. n°48 as regards end-outline marker lamps geometric visibility.

In the current text of Reg. n°7, the end-outline marker lamp has to comply with the requirements of position lamps (cf. paragraph 5.3). The geometric visibility requirements for position lamps in Reg. 7 are the following:

- Inside the vehicle: 45°
- Outside the vehicle: 80°

For installation on a vehicle according to Reg. n°48, the requirements for end-outline marker lamps installed on a vehicle are:

- Inside the vehicle: 0°
- Outside the vehicle: 80°

The proposal introduce new categories of lamps in Reg. n°7 (AM for front end-outline marker lamps, RM1 and RM2 for rear end-outline marker lamps), with a geometric visibility consistent with Reg. n°48. However, the paragraph 5.3 will still allow the use lamps of categories A, R, R1 or R2 as end-outline marker lamps.

A combined proposal modifies Reg. n°48 accordingly.
