PROPOSAL FOR DRAFT AMENDMENTS TO REGULATION No. 49 - Rev.4

Note: The text reproduced below was prepared by the experts from the GRPE GFV group in order to include gas fuelled engines in Annex 9B (OBD according to gtr No. 5) to Regulation No. 49 Rev.4

PROPOSAL

1. Annex 9B, amend the title to read:

"Annex 9B

TECHNICAL REQUIREMENTS FOR ON-BOARD DIAGNOSTIC SYSTEMS (OBD) FOR DIESEL ENGINES (WWH-OBD, gtr No. 5) AND GAS FUELLED ENGINES FOR ROAD VEHICLES"

(Editorial note: the elements of this proposal mentioned in square brackets and/or highlighted in yellow need to be further discussed in order to ensure consistency with Annex 4B and to address as appropriate the needs of the Contracting Parties.)

2. Annex 9B section 1, amend to read:

"1. APPLICABILITY

This annex is applicable upon decision of the Contracting Parties [instead of Annex 9A], provided Annex 4B is also applied.

[In the case a Contracting Party decides to apply this annex, some requirements of annex 9A may still remain applicable at the explicit request of that Contracting Party provided these requirements are not in contradiction to the specifications of the present annex.]

This annex is applicable to Diesel or Gas (NG and LPG) fuelled engines to be mounted on road vehicles but is not applicable to dual- or bi-fuelled engines."

3. Annex 9B section 3.35, amend to read:

"3.35. "Warm-up cycle" means sufficient engine operation such that the coolant temperature has risen by at least 22 K (22 °C / 40 °F) from engine starting and reaches a minimum temperature of 333 K (60 °C / 140 °F) 1/."
4. Annex 9B section 3.36, amend to read:

"3.36. Abbreviations

CV Crankcase Ventilation
DOC Diesel Oxidation Catalyst
DPF Diesel Particulate Filter or Particulate Trap including catalyzed DPFs and Continuously Regenerating Traps (CRT)
DTC Diagnostic trouble code
EGR Exhaust Gas Recirculation
HC Hydrocarbon
LNT Lean NOx Trap (or NOx absorber)
LPG Liquefied Petroleum Gas
MECS Malfunction Emission Control Strategy
NG Natural Gas
NOx Oxides of Nitrogen
OTL OBD Threshold Limit
PM Particulate Matter
SCR Selective Catalytic Reduction
SW Screen Wipers
TFF Total Functional Failure monitoring
VGT Variable Geometry Turbocharger
VVT Variable Valve Timing"

5. Annex 9B section 4 1st paragraph, amend to read:

"4.

GENERAL REQUIREMENTS

In the context of this annex, the OBD system shall have the capability of detecting malfunctions, of indicating their occurrence by means of a malfunction indicator, of identifying the likely area of the malfunctions by means of information stored in computer memory, and communicating that information off-board."

6. Annex 9B section 4.7.1.2 (l), amend to read:

"4.7.1.2. Information about active emission-related malfunctions
(l) the confirmed and active DTCs for Class B1 malfunctions;"

7. Annex 9B section 5.2.3, amend to read:

"5.2.3. Low fuel level

Manufacturers may request approval to disable monitoring systems that are affected by low fuel level / pressure or running out of fuel (e.g. diagnosis of a malfunction of the fuelling system or misfiring) as follows:
(a) The low fuel level considered for such a disablement shall not exceed 100 litres or 20 per cent of the nominal capacity of the fuel tank, whichever is lower.

(b) The low fuel pressure in the tank considered for such a disablement shall not exceed 20 per cent of the nominal fuel pressure in the tank

8. **Annex 9B section 5.2.**, add section 5.2.8. to read:

"5.2.8. Re-fuelling

After a refuelling the manufacturer of a gas fuelled vehicle may temporarily disable the OBD system when the system has to adapt to the recognition by the ECU of a change in the fuel quality and composition.

The OBD system shall be re-enabled as soon as the new fuel is recognised and the engine parameters are readjusted. This disablement shall be limited to a maximum of 10 minutes."

9. **Annex 9B section 6.**, add paragraph (d) to read:

"6. DEMONSTRATION REQUIREMENTS

(d) procedure for selecting the reference fuel in case of a gas engine"

10. **Annex 9B section 6.1.1. (a)**, amend to read:

"6.1.1. Parameters defining an emission-OBD family

(a) emission control systems"

11. **Annex 9B section 6.3.2 and foot note**, amend to read:

"6.3.2. Procedures for qualifying a deteriorated component (or system)

This paragraph applies to the cases where the malfunction selected for an OBD
demonstration test is monitored against tailpipe emissions 10/ (emission threshold monitoring - see paragraph 4.2.) and it is required that the manufacturer demonstrates, by an emission test, the qualification of that deteriorated component.

12. Annex 9B section 6., add section 6.5 to read:

"6.5. PROCEDURE FOR SELECTING THE REFERENCE FUEL IN CASE OF A GAS ENGINE
Demonstration of the OBD performance and malfunction classification shall be performed by using one of the reference fuels mentioned in Annex 5 on which the engine is designed to operate.
The selection of this reference fuel is done by the type-approval authority, who shall provide sufficient time for the test laboratory to supply the selected reference fuel"

13. Annex 9B section 8.1.3., amend last line to read:

"In addition, the manufacturer shall provide a list of all electronic input and output and identification of the communication protocol utilized by each emission-OBD family."

14. Annex 9B appendix 3, amend to read:

"Annex 9B - Appendix 3
MONITORING REQUIREMENTS

The Items of this appendix list the systems or components required to be monitored by the OBD system, according to paragraph 4.2. Unless specified otherwise, the requirements apply to both Diesel and Gas Engines"

15. Annex 9B appendix 3 Item 1 1st paragraph, amend to read:

"Appendix 3 - Item 1
ELECTRIC / ELECTRONIC COMPONENTS MONITORING

Electric/electronic components used to control or monitor the emission control systems described in this appendix shall be subject to Component Monitoring according to the provisions of paragraph 4.1. of this annex. This includes, but is not limited to, pressure sensors, temperature sensors, exhaust gas sensors and oxygen sensors when present, knock sensors, in-exhaust fuel or reductant injector(s), in-exhaust burners or heating elements, glow plugs, intake air heaters."

10/ "This paragraph will be extended to other monitors than emission threshold monitors at a later stage."
16. **Annex 9B appendix 3 Item 5, amend to read:**

"Appendix 3 - Item 5

OXIDATION CATALYSTS (incl. DIESEL OXIDATION CATALYST - DOC) MONITORING

This Item applies to oxidation catalysts that are separate from other after-treatment systems. Those that are included in the canning of an after-treatment system are covered within the appropriate Item of this appendix.

The OBD system shall monitor the following elements of the oxidation catalysts on engines so-equipped for proper operation:

(a) HC conversion efficiency: the oxidation catalysts ability to convert HC upstream of other after-treatment devices - total functional failure monitoring.

(b) HC conversion efficiency: the oxidation catalysts ability to convert HC downstream of other after-treatment devices - total functional failure monitoring."

17. **Annex 9B appendix 3 Item 6, amend to read:**

"Appendix 3 - Item 6

EXHAUST GAS RECIRCULATION (EGR) SYSTEM MONITORING

The OBD system shall monitor the following elements of the EGR system on engines so-equipped for proper operation:

(a1) EGR low/high flow: the EGR system's ability to maintain the commanded EGR flow rate, detecting both "flow rate too low" and "flow rate too high" conditions - emission threshold monitoring.

(a2) EGR low/high flow: the EGR system's ability to maintain the commanded EGR flow rate, detecting both "flow rate too low" and "flow rate too high" conditions - performance monitoring (monitoring requirement to be further discussed)

(b) slow response of the EGR actuator: the EGR system's ability to achieve the commanded flow rate within a manufacturer specified time interval following the command - performance monitoring.

(c) EGR cooler under cooling performance: the EGR cooler system's ability to achieve the manufacturer's specified cooling performance - performance monitoring

18. **Annex 9B appendix 3 Item 7, amend to read:**
Appendix 3 - Item 7

FUEL SYSTEM MONITORING

The OBD system shall monitor the following elements of the Fuel system on engines so-equipped for proper operation:

(a) Fuel system pressure control: fuel system ability to achieve the commanded fuel pressure in closed loop control - performance monitoring. X
(b) Fuel system pressure control: fuel system ability to achieve the commanded fuel pressure in closed loop control in the case where the system is so constructed that the pressure can be controlled independently of other parameters - performance monitoring. X
(c) Fuel injection timing: fuel system ability to achieve the commanded fuel timing for at least one of the injection events when the engine is equipped with the appropriate sensors - performance monitoring. X
(d) Fuel injection system: ability to maintain the desired air-fuel ratio (incl. but not limited to self adaptation features) – performance monitoring X

19. Annex 9B appendix 3 Item 8, amend to read:

Appendix 3 - Item 8

AIR HANDLING AND TURBOCHARGER/BOOST PRESSURE CONTROL SYSTEM

The OBD system shall monitor the following elements of the Air Handling and Turbocharger/Boost Pressure Control System on engines so-equipped for proper operation:

(a1) Turbo under/over boost: turbo boost system's ability to maintain the commanded boost pressure, detecting both "boost pressure too low" and "boost pressure too high" conditions – emission threshold monitoring. X
(a2) Turbo under/over boost: turbo boost system's ability to maintain the commanded boost pressure, detecting both "boost pressure too low" and "boost pressure too high" conditions – performance monitoring? X (monitoring requirement to be further discussed)
(b) Variable geometry turbo (VGT) slow response: VGT system's ability to achieve the commanded geometry within a manufacturer specified time - performance monitoring. X X
20. **Annex 9B appendix 3 Item 10, amend to read:**

"Appendix 3 - Item 10

MISFIRE MONITORING

(a) No prescriptions

(b) misfire that may cause catalyst damage (e.g. by monitoring a certain percentage of misfiring in a certain period of time) – performance monitoring

X

X

21. **Annex 9B appendix 3 Item 12 section (a), amend to read:**

"Appendix 3 - Item 12

ENGINE COOLING SYSTEM MONITORING

(a) Engine coolant temperature (thermostat): Stuck open thermostat. Manufacturers need not monitor the thermostat if its failure will not disable any other OBD monitors - total functional failure."

22. **Annex 9B appendix 3 Item 13, amend to read:**

"Appendix 3 - Item 13

EXHAUST GAS & OXYGEN SENSORS MONITORING

The OBD system shall monitor the

(a) electrical elements of the exhaust gas sensors on engines so-equipped for proper operation according to item 1 to this appendix – component monitoring.
(b) both the Primary and Secondary (fuel control) oxygen sensors. These sensors are considered as exhaust gas sensors to be monitored for proper operation according to item 1 to this appendix – component monitoring.

23. Annex 9B appendix 3, add Item 15 to read:

"Appendix 3 – Item 15

THREE-WAY CATALYST

The OBD system shall monitor the three-way catalyst on engines so-equipped for proper operation:

<table>
<thead>
<tr>
<th></th>
<th>DIESEL</th>
<th>GAS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Three-way Catalyst Conversion efficiency: the catalyst ability to convert NOx and CO – performance monitoring.</td>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

24. Annex 9B appendix 4, amend to read:

"FINAL COMPLIANCE REPORT

The documentation package and the herewith described OBD system / emission OBD family comply with the requirements of the following regulation:

Regulation … / version …/ enforcement date …. / type of fuel …"

25. Annex 9B appendix 4 item 4 section 1.1. table line "Test information", amend to read:

"Item 4 to the technical compliance report (example)

DEMONSTRATION TESTS OF THE OBD SYSTEM

1.1. OBD system tested on the engine test-bed
Test information
- Ambient testing conditions (temperature, humidity, pressure): . . .
- Place of test (incl. altitude): . . .
- Reference fuel: . . .
- Engine lubricating oil: . . .
- Date of test: . . .

26. Annex 9B appendix 5 table 3, amend to read:

"Annex 9B - Appendix 5
FREEZE FRAME AND DATA STREAM INFORMATION
Table 3: OPTIONAL INFORMATION, IF USED BY THE EMISSION OR THE OBD SYSTEM TO ENABLE OR DISABLE ANY OBD INFORMATION

<table>
<thead>
<tr>
<th>Freeze frame</th>
