

Proposal for corrigendum to (ECE/TRANS/WP.29/2010/23)

The modification to text is based on document ECE/TRANS/WP.29/2010/23 submitted for adoption to WP.29 and AC.1 by the Working Party on Lighting and Light-Signalling. The corrigendum is aimed at avoiding misinterpretation of the transitional provisions of draft Supplement 5 to the 04 series of amendments to Regulation No. 48. As a matter of fact, at its October 2009 session, GRE adopted ECE/TRANS/WP.29/GRE/2009/34 including transitional provisions reported in paragraph 12.21. These provisions referred only to the automatic switching and their alternatives of the dipped beam headlamps installed on a vehicle equipped with daytime running lamps and not to all provisions of Supplement 5. Accordingly, the text of transitional provisions should be amended as follows:

Page 8, paragraph 12.21., amend to read:

"12.21. As from 48 months from the official date of entry into force of Supplement 5 to the 04 series of amendments, Contracting Parties applying this Regulation shall grant approvals only if the vehicle type to be approved meets the requirements of **paragraphs 6.2.7.6. to 6.2.7.6.3.3.** of this Regulation as amended by Supplement 5 to the 04 series of amendments."
