Economic Commission for Europe
Inland Transport Committee
World Forum for Harmonization of Vehicle Regulations

101st session
Geneva, 18–21 October 2011
Item 9 of the provisional agenda
Regulation No. 125 (Forward field of vision of drivers)

Proposal for amendments to Regulation No. 125 (Forward field of vision of drivers)

Submitted by the expert from Japan*

The text reproduced below was prepared by the expert from Japan. It is based on ECE/TRANS/WP.29/GRSG/2011/16 distributed at the 100th session of the Working Party on General Safety Provisions (GRSG). The modifications to the current text of the Regulation are marked in bold for new or strikethrough for deleted characters.

*In accordance with the programme of work of the Inland Transport Committee for 2010–2014 (ECE/TRANS/208, para. 106 and ECE/TRANS/2010/8, programme activity 02.4), the World Forum will develop, harmonize and update UN Regulations in order to enhance the performance of vehicles. The present document is submitted in conformity with that mandate.
I. Proposal

The table of contents, amend to read:

"Regulation

1. Scope
2. Definitions
...
11. Names and addresses of Technical Services responsible for conducting approval tests, and of Administrative Departments

12. Transitional Provisions"

Paragraph 2.16., amend to read:

"2.16. A pillar means any the foremost and outermost roof support forward of the vertical transverse plane located 68 mm in front of the V points and includes non-transparent items such as windscreen mouldings and door frames, attached or contiguous to such a support."

Paragraph 4.2., amend to read:

"4.2. An approval number shall be assigned to each type approved. Its first two digits (00 at present 01 for the Regulation in its initial current form) shall indicate the series of amendments incorporating the most recent major technical amendments made to the Regulation at the time of issue of the approval. The same Contracting Party shall not assign the same number to the same vehicle type equipped with another type of field of vision, or to another vehicle type."

Insert a new paragraph 5.1.4., including new figures 1 and 2, to read:

"5.1.4. A 1.2 m tall cylindrical object with a diameter of 0.3 m that is situated inside the space bounded by a vertical plane located 2.0 m in front of the vehicle, a vertical plane located 2.3 m in front of the vehicle, a vertical plane located 0.4 m from the driver's side of the vehicle, and a vertical plane located 0.6 m from the opposite side of the vehicle shall be at least partially visible when viewed directly from V2 (see figure 1), regardless of where the object is within that space, unless it is invisible due to a blind spot(s) created by the A pillars, windscreen wipers, or steering wheel.

If the driver's seat is located in the central driving position of the vehicle, the 1.2 m-tall cylindrical object shall be situated inside the space bounded by a vertical plane located 2.0 m in front of the vehicle, a vertical plane located 2.3 m in front of the vehicle, a vertical plane located 0.5 m from the side of the vehicle (see figure 2)."

12.1. As from the official date of entry into force of the 01 series of amendments, no Contracting Party applying this Regulation shall refuse to grant approval under this Regulation as amended by the 01 series of amendments.

12.2. As from [24] months after the date of entry into force, Contracting Parties applying this Regulation shall grant approvals only if the vehicle type to be approved meets the requirements of this Regulation as amended by the 01 series of amendments.

12.3. Contracting Parties applying this Regulation shall not refuse to grant extensions of approval to the preceding series of amendments to this Regulation.

12.4. Contracting Parties applying this Regulation shall continue to grant approvals to those types of vehicles which comply with the requirements of this Regulation as amended by the preceding series of amendments during the [24] months' period which follows the date of entry into force of the 01 series of amendments.

12.5. No Contracting Party applying this Regulation shall refuse national or regional type approval of a vehicle type approved to the 01 series of amendments to this Regulation.

12.6. Until [72] months after the date of entry into force of the 01 series of amendments to this Regulation, no Contracting Party applying this Regulation shall refuse national or regional type approval of a vehicle type approved to the preceding series of amendments to this Regulation.

12.7. Starting [72] months after the entry into force of the 01 series of amendments to this Regulation, Contracting Parties applying this Regulation may refuse (national or regional type approval and may refuse) first national or regional registration (first entry into service) of
a vehicle which does not meet the requirements of the 01 series of amendments to this Regulation.

12.8. 

Notwithstanding the transitional provisions above, Contracting Parties whose application of this Regulation comes into force after the date of entry into force of the most recent series of amendments are not obliged to accept approvals which were granted in accordance with any of the preceding series of amendments to this Regulation."

Annex 2. amend to read:

“Annex 2

Arrangements of approval marks

See paragraphs 4.4. to 4.4.2. of this Regulation

The above approval mark affixed to a vehicle shows that the vehicle type concerned has been approved in Belgium (E6) with regard to the driver's forward field of vision pursuant to Regulation No. 125. The first two digits of the approval number indicate that the approval was granted in accordance with the requirements of Regulation No. 125 in its original form as amended by the 01 series of amendments.”

II. Justification

1. This proposal for the 01 series of amendments adds the transitional provisions and amends the arrangements of approval marks as above.

2. Some vehicles appear to have two A-pillars on each side. In this case, the number of A pillar seems to be in conflict with paragraph 5.1.2.2. Therefore, the definition of "A pillar" is clarified by aligning it with Regulation No. 29.

3. This proposal is a modified version of ECE/TRANS/WP.29/GRSG/2010/4, which was submitted for the purpose of preventing road accidents due to the inability of drivers of vehicles with an extremely high eye point to view small vehicles (e.g. motorcycles) in front.

4. ECE/TRANS/WP.29/GRSG/2010/4 proposed to add a new provision to paragraph 5.1.3. However, its relation to the area S of paragraph 5.1.3.1., proposed in ECE/TRANS/WP.29/GRSG/2009/20, was unclear. In order to clarify that relation, this proposal proposes to delete the language that had been added to paragraph 5.1.3. and to insert a new paragraph 5.1.4., thereby making it clear that the new provision is independent from the provision on the area S in paragraph 5.1.3.1.

5. The driver of a vehicle with an eye point of regular height, that satisfies the requirement of paragraph 5.1.3., is able to view small vehicles in front. But in a vehicle
with an extremely high eye point, it can be difficult for the driver to view some small vehicles even when paragraph 5.1.3. is met. The proposed new paragraph 5.1.4. can prevent this problem.

6. The wording "there should be no obstruction" was proposed in ECE/TRANS/WP.29/GRSG/2010/4. But the original objective of the proposal is to make it possible for drivers to view objects on the road (e.g. motorcycles) with a size equal to or more than the specified size. To be in line with that objective, this proposal amends the wording to "a 1.2 m tall cylindrical object with a diameter of 0.3 m shall be at least partially visible".
