II. Justification

1. This proposal aims mainly at launching the discussion on the transitional provisions of Regulation No. 48. It shows some open question the EC has on this issue. The proposed amendments are shown in bold/strikethrough. The paragraphs, outdated as of the October 2012 session of GRE, and candidates for deletion, are in square brackets. The comments are highlighted in yellow. Given the urgency explained below, the Commission will push for a more elaborated proposal at the next session of GRE, in particular to bring the Regulation in line with the guidelines on transitional provisions adopted by WP.29 recently (ECE/TRANS/WP.29/2011/152).

2. Regulation No. 48 will soon be made mandatory in the EU. Hence, from 1 November 2012, Regulation No. 48 will be used for new types of vehicles (04 series of amendments). Moreover, from 1 November 2014, the corresponding Directive will be repealed and from that date only Regulation No. 48 will be used for EU whole vehicle type-approval. Therefore, more than ever, clear transitional provisions are needed to know what applies on a mandatory basis in the EU.

3. Four series of amendments are presently running in parallel (03, 04, 05 and 06). Furthermore, some Supplements were adopted with transitional provisions. Some of them become mandatory before the series they are amending (see para. 12.12). Finally, some transitional provisions are not transitional but permanent.

4. This situation is not manageable in the long run. This leads to confusion and does not ensure legal certainty for operators. Moreover, this creates difficulty for the consolidation of Regulations. Normally the rule should be: one new series replaces the old one (this is why we have Transitional provisions) and supplements should be adopted with no transitional provision.
