

Corrigendum to ECE/TRANS/WP.29/GRSG/2011/14**(Regulation No. 67)****A. Proposal**

Annex 15, table 3, amend to read:

"**Table 3:** The classification and leakage test pressures according to the classification:

Classification of component	Classification pressure [kPa]	Test pressure for leakage test [kPa]
Class 0	WP	1.5 · WP
Class 1	3,000	4,500
Class 2A	120	180
Class 2	450	675
Class 3	3,000	6,750

"

B. Justification

Table 3 of Annex 15, setting out the test pressures for external leakage test, does not contain any value for Class 0 components.

The proposal aims at clarifying which aerostatic pressure shall be reached during the external leakage test (para. 5 of Annex 15) of Class 0 components, in line with the provision of paragraph 5.3.
