Rail security: coherence and resilience

Jacques Colliard, Manager of the UIC Security Division
Coherence in the definitions

Security is to act against negative wills

But organize an objective level of security or/and create a feeling of security?

Human factors, technologies strategy and regulation
Coherence in the responsibilities and roles of each relevant actor

> National authorities: protect security of people and goods on the territory

> Railway companies: protect clients, staff, and facilities

  infrastructure managers

  undertakings

    incumbents and new comings

    national and foreign
Coherence in a same place

Multi-role of the important stations
  place of transport
  place of city
  place of life

Presence of various railway actors at the same time
  Who has what to do? How to be sure of each?

Global request of the clients
Coherence beyond the borders

> Development of the international traffic

  art 26 : right to security of the travellers
Coherence for the future: current research projects involving UIC security

> PROTECTRAIL
> RESTRAIL
> SECRET
> CIPRnet
> PREDICT
> GRAFFOLUTION
> INFRARISK
Coherence of policies: towards integrated protection

- Security
- Safety
- Civil protection
- All hazards
Resilience

> Crisis management

> Crisis communication

> Emergency exercises
Thank you for your kind attention
