

Proposal for the final report on the development of the global technical regulation on Tyres

At its 158th session held in November 2012, the WP.29 approved an interim report on the development of the global technical regulation on Tyres. This document bears the reference ECE/TRANS/WP.29/2012/125 and was previously presented to GRRF at its 73rd session under the symbol 73-03.

This document includes:

In Part A: The detailed proposal to develop a global technical regulation on tyres based on the document considered and approved by AC.3 in November 2006 (TRANS/WP.29/WP.29/AC.3/15)

In Part B: The preliminary report on the development of a global technical regulation on tyres. All the details of that preliminary report being also included in the part C of the draft of the regulation, **the final report will include the possible corrections and modifications brought during this session.**

In Part C: The future work. Among all the works remaining to be done, there are harmonised tests for the Light Truck / Commercial tyres. The road map expects to present a new draft of GTR including Phase II at the 75th session of GRRF. **This issue has to be discussed in order to define if an updated road map is necessary.**

In Part D: Conclusion.

At its last session, GRRF decided to get together the members of the informal group for one meeting more on Monday 18 February 2013 in order to finalize the review of the draft of the regulation.

In its 74th session, GRRF could consider in detail the text of the final draft of GTR on Tyres and could agree to recommend its establishment in the Global registry and to submit it to WP.29/AC.3 for consideration and voting at its June 2013 session.
