Annex 7: Definition of the vehicle type ................................................................................................. 33
Part A: Vehicles of category M1 ........................................................................................................... 33
1. Scope
1.1 This Regulation applies to vehicles of categories M1\(^1\). It specifies requirements for the type approval of a whole vehicle.

2. Definitions

For the purposes of this Regulation and of the Regulations listed in Annex 4, unless specified otherwise therein:

2.1 "Manufacturer" means the person or body responsible to the approval authority for all aspects of the type approval process and for ensuring conformity of production. It is not essential that the person or body is directly involved in all stages of the construction of the vehicle which is the subject of the approval process.

2.1.1 "Manufacturer's representative" means a natural or legal person established in the territory of one of the Contracting Parties applying this Regulation who is duly appointed by the manufacturer to represent it before the approval authority and to act on its behalf in matters covered by this Regulation. Where reference is made in this Regulation to the manufacturer, it means either the "Manufacturer" or the "Manufacturer’s representative".

2.2. "Vehicle type" means a category of vehicles which do not differ in such essential respects as those specified in Annex 7. A vehicle type may contain variants and versions as defined in Annex 7.

2.3. "International Whole Vehicle Type Approval (IWVTA)" means the procedure whereby a Contracting Party applying this Regulation certifies that a vehicle type satisfies the relevant administrative provisions and technical requirements of this Regulation and of the UN Regulations listed in Annex 4.

2.3.1 "Universal IWVTA (U-IWVTA)" means an IWVTA which is granted for whole vehicles complying to all the UN Regulations listed in Annex 4, Section 1 and is accepted by all Contracting Parties applying this Regulation.

2.3.2 "IWVTA of Limited recognition (L-IWVTA)" means an IWVTA which is accepted by some Contracting Parties applying this Regulation. The concept is introduced to allow Contracting Parties to accept vehicles meeting a smaller set of requirements by:

- Not requiring all approvals necessary for a U-IWVTA; and/or
- Accepting approvals to previous series of amendments or to un-amended UN Regulations for one or more of the systems covered by U-IWVTA.

2.4 "Information document" means the document set out in Annex 5 that prescribes the information to be supplied by an applicant. This may be in the form of an electronic file.

2.5 "Information folder" means a folder that includes the information document, file, data, drawings, photographs, and other relevant material, that is supplied by the applicant. This may be in the form of an electronic file.

---

\(^1\)As defined in the Consolidated Resolution on the Construction of Vehicles (R.E.3.), document ECE/TRANS/WP.29/78/Rev.2, paragraph 2.2.1. –
2.6 “Information package” means the information folder accompanied by the test reports and all other documents added by the Technical Service or by the approval authority to the information document in the course of carrying out their functions. This may be in the form of an electronic file.

2.7 “Index to the information package” means the document listing the contents of the information package, suitably numbered or otherwise marked so as to identify clearly all the pages. The format of the document shall be such as to present a record of the successive steps in administering the type approval, in particular when any revisions or updates occurred.

2.8 “Technical competence”: means, having regard to Article 2 of the 1958 Agreement, that a Contracting Party has the capability to verify the compliance of a whole vehicle type with this Regulation, based on the individual type approvals submitted by the manufacturer in its application and the ability to confirm that the systems and components are installed pursuant to the individual UN Regulations listed in Annex 4 of this Regulation. This means that a Contracting Party applying this Regulation need not necessarily have the technical competence required to issue type approvals with respect to all the UN Regulations listed in Annex 4.

2.9 “Document of Fulfilment (DoF)” means the document set out in Annex 6 issued by the manufacturer and certifying that a vehicle belonging to the series of the vehicle type to be approved in accordance with this Regulation complies with all regulatory acts at the time of its production.]

3. Application for approval

3.1 The application for approval of a vehicle type with regard to IWVTA shall be submitted by the manufacturer to the Contracting Party according to the provisions of Schedule 3 of the 1958 Agreement.

3.2 It shall be accompanied by the following documentation:

3.2.1 The information folder containing the information required under Annex 5, Part II.

3.2.2 The list of UN Regulations to which the vehicle type complies according to Annex 5, Part III.

3.2.3 Type approval certificates according to Annex 4;

3.2.3.1 In the case of a U-IWVTA the complete set of type approval certificates required pursuant to each of the applicable UN Regulations listed in Annex 4, Part A, Section 1.

3.2.3.2 In the case of an L-IWVTA, one or more type approval certificates required by paragraph 3.2.3 can be omitted or replaced by the certificate according to earlier versions of the UN Regulations.

3.2.4 The DoF containing the information as defined in Annex 6.

3.2.5 A translation sheet of the vehicle independent information as defined in Appendix 1 to Annex 6 in the language or languages of the Contracting Party.

3.3 The application for approval and the accompanying documentation shall be drawn up in English language. If needed, the applicant shall provide translation of the documentation in the language requested by the Contracting Party processing the application. These requirements need not
apply to type approval certificates accompanying the application.

4. Approval

4.1 If the vehicle type submitted for approval pursuant to this Regulation meets the requirements of this Regulation, approval of that vehicle type shall be granted.

4.2 An approval number shall be assigned to each type approved in accordance with the provisions of Schedule 4 of the 1958 Agreement.

4.3 Notice of approval or of extension or refusal of approval of a vehicle type pursuant to this Regulation shall be communicated by means of a secure internet database in accordance with Schedule 5 of the 1958 Agreement to the Contracting Parties to the 1958 Agreement applying this Regulation, using a form conforming to the model in Annex 1 to this Regulation.

4.4 An international approval mark shall be affixed, conspicuously and in a readily accessible place specified on the approval form, to every vehicle conforming to a vehicle type approved under this Regulation. Such an international approval mark shall consist of:

4.4.1 A circle surrounding the letter “E” followed by the distinguishing number of the country which has granted approval;

4.4.2 The number of this Regulation, followed by the letter “R”, a dash and the two digits of Section 2 indicating the applied series of amendments and the digits of Section 3 of the approval number referred to in paragraph 4.2 to the right of the circle prescribed in paragraph 4.4.1. The leading zeros to Section 3 may be omitted.

4.5 That international approval mark may be replaced by the Identifier in accordance with the provisions of Schedule 5 of the 1958 Agreement.

4.6 If the vehicle conforms to a vehicle type approved according to this Regulation, approval marks with regard to approvals granted for the UN Regulations listed in Annex 4, which are prescribed to be affixed to every vehicle, need not to be affixed to the vehicle.

4.7 The approval mark or Identifier shall be clearly legible and be indelible.

4.8 The approval mark or Identifier shall be placed close to or on the vehicle data plate affixed by the manufacturer.

4.9 Annex 2 to this Regulation gives an example of the arrangement of the approval mark or Identifier.

5. Specifications

5.1 Required certificates

The procedures of Annex 3 shall be followed:

5.1.1 A vehicle shall meet the prescribed requirements of this Regulation as well as those specified within the UN Regulations listed in Annex 4. This shall be demonstrated by type approval certificates according to those UN Regulations that cover all variants and versions of a vehicle type.

5.1.2 For a U-IWVTA to be recognized by all Contracting Parties applying this Regulation, this includes compliance to all UN Regulations listed in Annex 4, Part A, Section 1.

---

5 see annex 3 of Document ECE/TRANS/WP.29/78/Rev.2
5.1.3. For an L-IWVTA one or more type approval certificates required by paragraph 3.2.3 can be omitted or replaced by the certificate according to an earlier version of the respective UN Regulation, taking into account the provisions of Annex 4, Part A, Section 2.

6. Test Procedure

6.1 Where compliance to the requirements of paragraph 5 is demonstrated by providing all required certificates that cover all variants and versions of the vehicle type, no further testing is foreseen for IWVTA.

7. [Modification of vehicle type and extension of approval]

[7.1 Every modification of the vehicle type shall be notified to the [Contracting Party or its designated] approval authority which approved the IWVTA. The [Contracting Party or its designated] approval authority may then either (a) Decide, in consultation with the manufacturer, that a new IWVTA is to be granted, or (b) Apply the procedure contained in paragraph 7.1.1. (Revision) and, if applicable, the procedure contained in paragraph 7.1.2. (Extension).

7.1.1 Revision

Where particulars recorded in the information package have changed, the amendment shall be designated a ‘revision’. In such a case, the approval authority shall issue the revised page(s) of the information package as necessary, marking each revised page to show clearly the nature of the change and the date of re-issue. A consolidated, updated version of the information package, accompanied by a detailed description of the changes, shall be deemed to meet this requirement.

7.1.2 Extension

The modification shall be designated an ‘extension’ if, in addition to the change of the particulars recorded in the information folder:

(a) further inspections or new tests are required, or
(b) any information on the communication document (with the exception of its attachments) has changed, or
(c) new requirements under any of the UN Regulations applicable to the approved vehicle type enter into force and have been type approved for the vehicle type in question.

In such cases, the approval authority shall issue a revised communication document denoted by an extension number and incremented in accordance with the number of successive extensions already granted. The communication document shall show clearly the reason for the extension and the date of re-issue.

7.2 Whenever amended pages or a consolidated, updated version are issued, the index to the information package attached to the communication document shall be amended accordingly to show the date of the most recent revision or extension, or the date of the most recent consolidation of the updated version.

7.3 No amendment to the approval of a vehicle type shall be required if the new requirements referred to in paragraph 7.1.2(c) are, from a technical perspective, not relevant to that vehicle type.
7.4 In the case of an extension, the approval authority shall update all relevant sections of the communication document, the attachments thereto, and the index to the information package. The updated communication document and its attachments shall be issued to the applicant without unjustified delay.

7.5 In the case of a revision, the revised documents or the consolidated, updated version, as appropriate, including the revised index to the information package, shall be issued by the approval authority to the applicant without unjustified delay.

7.6 Confirmation or refusal of approval, specifying the alterations, shall be communicated by the procedure specified in paragraph 4.3. above to the approval authorities of the Contracting Parties applying this Regulation.

8. Conformity of production

The conformity of production procedures shall comply with those set out in Schedule 1 of the 1958 Agreement with the following requirements:

8.1 A vehicle approved to this Regulation shall be so manufactured as to conform to the type approved by meeting the requirements of paragraph 5. above.

8.2 The approval authority which has granted type approval may at any time verify the conformity control methods applied in each production facility. Such verification should primarily be aimed at the whole vehicle and assembly level activities and shall not, without reasonable justification, repeat previous assessments undertaken for the separate UN Regulations comprising part of the IWVTA.

9. Penalties for non-conformity of production

9.1 The approval granted in respect of a vehicle type pursuant to this Regulation may be withdrawn if the requirements are not complied with or if a vehicle bearing the approval mark does not conform to the vehicle type approved.

9.2 If a Contracting Party to the Agreement applying this Regulation with draw an approval it has previously granted, it shall forthwith so notify the other Contracting Parties applying this Regulation by means of a communication form conforming to the example in Annex 1 to this Regulation.

10. Production definitely discontinued

If the holder of the approval completely ceases to manufacture a vehicle type approved in accordance with this Regulation, they shall inform the approval authority, which granted the approval. Upon receiving the relevant communication, that approval authority shall inform the other Contracting Parties to the 1958 Agreement applying this Regulation by means of a communication form conforming to the example in Annex 1 to this Regulation.

11. Names and addresses of Technical Services responsible for conducting approval tests and of approval authorities

The Contracting Parties to the 1958 Agreement applying this Regulation shall communicate to the United Nations Secretariat the names and addresses of the
Technical Services they have designated for conducting inspections and approval tests and of the approval authorities which grant approvals and to which forms certifying approval or extension or refusal or withdrawal of approval are to be sent.

12. [Introductory and transitional provisions]

With this Regulation IWVTA is intended as an alternative to obtaining national or regional whole vehicle type approval. In this respect it is voluntary, and can be applied for at the discretion of the vehicle manufacturer.

This Regulation has no introductory provisions apart from the date of entry into force. However, when type approving a vehicle to this regulation the transitional provisions of each UN Regulation listed in Annex 4 shall be met for the respective vehicle systems.]

13 Special provisions for Contracting Parties applying this Regulation

13.1 Regardless of whether a Contracting Party applies any UN Regulations listed in Annex 4 it shall accept in accordance with the principles laid down in Article 1 of the 1958 Agreement a U-IWVTA as evidence of compliance for all vehicle systems, equipment and parts approved therein.

13.2 Regardless of whether a Contracting Party applies any UN Regulations listed in Annex 4 it may issue type approvals to this Regulation subject to the provisions of Article 2 of the 1958 Agreement, taking account of paragraph 2.8 of this Regulation.

13.3 Regardless of whether a Contracting Party applies any UN Regulations listed in Annex 4 it shall for the purpose of granting an IWVTA accept any type approvals issued according to UN Regulations listed in Annex 4. [For U-IWVTA it shall accept type approvals issued in accordance to the series of the amendments of the UN Regulations as listed in Annex 4, Section 1.]

13.4 Regardless of whether a Contracting Party applies any UN Regulations listed in Annex 4 it shall for the purpose of placing on the market of components for vehicles covered by a U-IWVTA, accept the individual type approvals referenced in the IWVTA as evidence of compliance for the respective vehicle systems, equipment and parts.]

13.5 If a Contracting Party wishes to accept either type approvals to earlier versions than those specified in Annex 4, Part A, Section 1 or the absence of type approvals, it shall notify so to the Secretariat of the Administrative Committee. For such notification including any changes the format provided in Annex 4, Part A, Section 3 shall be used. That Contracting Party shall then accept as evidence of compliance an L-IWVTA which includes at least the type approvals that are in accordance with the notification by the Contracting Party regarding Annex 4, Part A, Section 3. For all vehicle systems, equipment and parts approved therein approvals to later versions of the individual UN Regulations than those notified shall also be accepted.
Annex 1: Communication

Part A: Vehicles of category M1
(Maximum format: A4 (210 x 297 mm))

issued by: Name of type approval authority

concerning: - APPROVAL GRANTED
- APPROVAL EXTENDED
- APPROVAL REFUSED
- APPROVAL WITHDRAWN
- PRODUCTION DEFINITELY DISCONTINUED

of a vehicle type with regard to IWVTA, pursuant to UN Regulation No. 0.

Approval No.: ...............................................................
Extension No.: ............................................................
Reason for extension:

SECTION I
0.1. Make (trade name of manufacturer):
0.2. Type:
0.2.1. Commercial name(s) (2):
0.3. Means of identification of type, if marked on the vehicle:
0.3.1. Location of that marking:
0.4. Category of vehicle (3):
0.5. Name and address of manufacturer:
0.8. Name(s) and address(es) of assembly plant(s):
0.9. Name and address of the manufacturer's representative (if any):

---

3 Distinguishing number of the country which has granted, extended, refused or withdrawn approval (see approval provisions in the Regulation).
4 Strike out what does not apply.
SECTION II
The undersigned hereby certifies the accuracy of the manufacturer’s description in the attached information document of the vehicle(s) described above ((a) sample(s) having been selected by the type approval authority and submitted by the manufacturer as prototype(s) of the vehicle type) and that the attached test results are applicable to the vehicle type.

1. The vehicle type meets/does not meet \(^{(1)}\) the technical requirements of all the relevant UN Regulations as prescribed in Annex 4 to this Regulation.
2. The approval is granted/extended/refused/withdrawn \(^{(1)}\).
3. The approval is granted in accordance with the procedure for new technologies as defined in Schedule 7 of the 1958 Agreement and the validity of the approval is thus limited to dd/mm/yy\(^{(1)}\).

(Place) (Signature) (Date)

Attachments:
- Information package.

Exemplary notes:

\(^{(1)}\) Delete where not applicable.

\(^{(2)}\) If not available at the time of granting the type approval, this item shall be completed at the latest when the vehicle is introduced on the market.

\(^{(3)}\) As defined in paragraph 2 to the Consolidated Resolution on the Construction of Vehicles (R.E.3) (document TRANS/WP.29/78/Rev.2).
Annex 2: Arrangement of the approval mark
(See paragraph 4.4. of this Regulation)

Section I: Approval mark for U-IWVTA

\[
\text{a} = 8 \text{ mm min.}
\]

The above approval mark affixed to a vehicle shows that the vehicle type concerned has, with regard to U-IWVTA, been approved in the Netherlands (E4) pursuant to this Regulation under the approval No. 001234. The first two digits (00) of the approval number indicate that the approval was granted in accordance with the requirements of this Regulation in its original form. The letter U identifies the approval as universal (cf. Article 2.3.1)

Section II: Approval mark for an L-IWVTA

\[
\text{a} = 8 \text{ mm min.}
\]

The above approval mark affixed to a vehicle shows that the vehicle type concerned has, with regard to L-IWVTA, been approved in the Netherlands (E4) pursuant to this Regulation under the approval No. 001234. The first two digits (00) of the approval number indicate that the approval was granted in accordance with the requirements of this Regulation in its original form. The letter L identifies the approval as one of limited recognition (cf. Article 2.3.2)
Section III: Approval mark using the Identifier referred to in paragraph 4.5 of this Regulation

The above Identifier affixed to a vehicle shows that the vehicle type concerned has been approved and that the relevant information on that type approval can be accessed on the UN secure internet database by using 270650 as identifier.
Annex 3: Procedures to be followed for IWVTA

0. Objectives and scope

0.1 This Annex sets out the procedures for IWVTA in accordance with the provisions of paragraph 5.1

1. Type approval process

When receiving an application for IWVTA, the Contracting Party shall:

(a) verify that all type approval certificates issued pursuant to the UN Regulations which are applicable for IWVTA cover the vehicle type and correspond to the prescribed requirements;
(b) by reference to the documentation make sure that the vehicle specifications and data contained in Part I of the vehicle information document are included in the data in the information packages and in the type approval certificates in respect of the relevant UN Regulations;
(c) when an item number in Part I of the information document is not included in the information package of any of the UN Regulations, confirm that the relevant part or characteristic conforms to the particulars in the information document;
(d) on a selected sample of vehicles from the type to be approved carry out or arrange to be carried out inspections of vehicle parts and systems to verify that the vehicle(s) is/are built in accordance with the relevant data contained in the authenticated information package in respect of the relevant type approval certificates;
(e) carry out or arrange to be carried out relevant installation checks in respect of separate technical units where applicable;

2. Combination of technical specifications

The number of vehicles to be submitted shall be sufficient to permit the proper check of the various combinations to be type approved according to the following criteria:

<table>

Annex 4: List of requirements for the purpose of IWVTA: List of regulatory acts

Part A: Requirements for vehicles of category M1

Section 1: List of requirements for U-IWVTA

In order to apply for a U-IWVTA the following UN Regulations have to be complied with and type approved for all variants and versions of a vehicle type for which approval is sought. In cases where these UN Regulations contain requirements both for parts and their installation on the vehicle, both aspects shall be covered by type approvals.

**: These UN regulations have been identified as key topics and are under review by the competent subsidiary working parties for their inclusion in this Regulation.

\(^6\)If a regulation number is followed by (*) this indicates that the respective requirement applies only if the corresponding system is fitted to the vehicle. This then means that for the purpose of a U-IWVTA both vehicles with or without this system are acceptable. However, where the system is fitted to the vehicle the requirement applies. The same also applies to systems not identified by * where it can be demonstrated that the corresponding requirements are not applicable to the vehicle type.

\(^7\)This represents the required minimum level of amendment and includes all supplements in force at the time the approval is issued. Approvals to any later series of amendments are equally acceptable.
Section 2: Provisions and requirements for L-IWVTA

In case of an L-IWVTA not all type approvals according to Section 1 of this part have to be provided. The manufacturer in applying for such an IWVTA can decide whether to:

- omit one or more type approvals required in Section 1 for U-IWVTA
- replace one or more type approvals required in Section 1 by approvals according to earlier versions of the respective UN Regulations.

Information about what will be acceptable to each Contracting Party under the limited recognition scheme can be found in [add reference to document number or website where a compendium of notifications will be published].

Informal document **WP.29-162-11**

(162nd WP.29, 11-14 March 2014, agenda item 4.3.)
Annex 5: Information document for the purpose of IWVTA

General prescriptions
The following information shall be supplied in triplicate and include a list of contents. Any drawings shall be supplied in appropriate scale and in sufficient detail on size A4, or on a folder of A4 format. Photographs, if any, shall show sufficient detail.

Part I: Identification of the variants and versions
Provide a suitable identification of all the variants and versions (as defined in Annex 7) within the vehicle type for which approval is sought. The identification scheme has to be used in Part II to transparently denote which data entries in the information document apply to which variant(s) and version(s) within the vehicle type.

Part II: Information document

A. Vehicles of category M1
[editorial note: entries in blue text should be reviewed whether they are necessary for category M1.]

9.17.4.1. The meaning of characters in the second section and, if applicable, in the third section used to comply with the requirements of section 5.3 of ISO Standard 3779-1983 shall be explained: 

9.17.4.2. If characters in the second section are used to comply with the requirements of section 5.4 of ISO Standard 3779-1983, these characters shall be indicated: 

9.22. **Front under-run protection**

9.22.0. Presence: yes/no/incomplete (1)

9.23. **Pedestrian protection**

9.23.1. A detailed description, including photographs and/or drawings, of the vehicle with respect to the structure, the dimensions, the relevant reference lines and the constituent materials of the frontal part of the vehicle (interior and exterior), including detail of any active protection system installed

9.24. **Frontal protection systems**

9.24.1. General arrangement (drawings or photographs) indicating the position and attachment of the frontal protection systems:

9.24.3. Complete details of fittings required and full instructions, including torque requirements, for fitting:

11. **CONNECTIONS BETWEEN TOWING VEHICLES AND TRAILERS AND SEMI-TRAILERS**

11.1. Class and type of the coupling device(s) fitted or to be fitted:

11.3. Instructions for attachment of the coupling type to the vehicle and photographs or drawings of the fixing points at the vehicle as stated by the manufacturer; additional information, if the use of the coupling type is restricted to certain variants or versions of the vehicle type:

11.4. Information of the fitting of special towing brackets or mounting plates:

11.5. Type approval number(s):

Exemplary notes:

(1) Delete where not applicable (there are cases where nothing needs to be deleted when more than one entry is applicable).

(2) Specify the tolerance.

(3) Please fill in here the upper and lower values for each variant.

(b) Vehicles can be fuelled with both petrol and a gaseous fuel but, where the petrol system is fitted for emergency purposes or starting only and of which the petrol tank cannot contain more than 15 litres of petrol, will be regarded for the test as vehicles which can only run a gaseous fuel.

(b) If the means of identification of type contains characters not relevant to describe the vehicle types covered by this information document, such characters shall be represented in the documentation by the symbol ‘?’ (e.g. ABC??123??).

(c) Classified according to the definitions as defined in Annex 7 to the Consolidated Resolution on the Construction of Vehicles (R.E.3) (document TRANS/WP.29/78/Rev.1/Amend.2 as last amended by Amend.4).

Motor vehicle and drawbar trailer: term No 6.4.1.
Semi-trailer and centre-axle trailer: term No 6.4.2.

Note: In the case of a centre-axle trailer, the axis of the coupling shall be considered as the foremost axle.

Term No 6.5.
Term No 6.1.
Term No 6.2
Term No 6.3

For trailers or semi-trailers, and for vehicles coupled with a trailer or a semi-trailer, which exert a significant vertical load on the coupling device or the fifth wheel, this load, divided by standard acceleration of gravity, is included in the maximum technically permissible mass.

In the case of a vehicle that can run either on petrol, diesel, etc., or also in combination with another fuel, items shall be repeated.

In the case of non-conventional engines and systems, particulars equivalent to those referred to here shall be supplied by the manufacturer.

This value shall be calculated \( \pi = 3.1416 \) and rounded off to the nearest cm\(^3\).

Determined in accordance with the requirements as defined in Annex 1 to the Consolidated Resolution on the Construction of Vehicles (R.E.3) (document TRANS/WP.29/78/Rev.1/Amend.2 as last amended by Amend.4).

Note: this annex has been deleted. Reference is needed

The specified particulars are to be given for any proposed variants.

With respect to trailers, maximum speed permitted by the manufacturer.

For tyres of category Z intended to be fitted on vehicles whose maximum speed exceeds 300 km/h equivalent information shall be provided.

The number of seating positions to be mentioned shall be the one when the vehicle is in motion. A range can be specified in case of modular arrangement.

**Part III: Type approval numbers**

Supply the information required by the following table in respect of the applicable subjects for this vehicle in Annex 4. (All relevant approvals for each subject shall be included. However, information in respect of components need not be given here so long as such information is included in the approval certificate relating to the installation prescriptions).

[Annex 6: IWVTA document of fulfilment (DoF)]

[0. OBJECTIVES
The IWVTA document of fulfilment (DoF) is a statement delivered by the vehicle manufacturer to the Contracting Party in order to assure that the vehicle complies with the legislation mandated by this Regulation at the time it was produced.

For these purposes, the IWVTA document of fulfilment has to include:
(a) the Vehicle Identification Number;
(b) the exact technical characteristics of the vehicle (i.e. it is not permitted to mention any range of value in the various entries).

1. GENERAL DESCRIPTION
1.1. The IWVTA document of fulfilment shall consist of
(a) SIDE 1, which consists of a statement of fulfilment by the manufacturer.
(b) SIDE 2, which is a technical description of the main characteristics of the vehicle.
(c) SIDE [3], which is a detailing the requirements of Annex 4 that are fulfilled.

1.2. The IWVTA document of fulfilment shall be established in a maximum format A4 (210 × 297 mm) or a folder of maximum format A4.
1.3. Without prejudice to the provisions in Section 0. (b), the values and units indicated in the second part shall be those given in the type approval documentation of the relevant UN Regulations. In case of conformity of production checks the values shall be verified according to the methods laid down in the relevant UN Regulations. The tolerances allowed in those UN Regulations shall be taken into account.

2. SPECIAL PROVISIONS
2.1. Model A shall be used for the IWVTA document of fulfilment of complete vehicles.
Model A:
IWVTA document of fulfilment for vehicles of category M1

SIDE 1
The undersigned [ ......................................................... (Full name and position)] hereby certifies that the vehicle:

0.1. Make (Trade name of manufacturer): .................................................................
0.2. Type: .................................................................................. ...................................
Variant (a): ..................................................................................................................
Version (a): ..................................................................................................................
0.2.1. Commercial name: .................................................................................................
0.4. Vehicle category: ...........................................................................................................
0.5. Name and address of manufacturer: ........................................................................
0.6. Location and method of attachment of the statutory plates: ....................................
Location of the vehicle identification number: ..........................................................
0.9. Name and address of the manufacturer’s representative (if any): .........................
0.10. Vehicle identification number: .............................................................................

conforms in all respects to the type described in the documents for application of approval indicating the status of being produced for right/left (b) hand traffic and with metric/imperial (c) units for the speedometer (d).

(Place) (Date): … (Signature): .................................................................

SIDE 2
General construction characteristics
1. Number of axles: ........................................ and wheels: ........................................

### Explanatory Notes

1. **Delete where not applicable.**
   
2. **(a)** Indicate the identification code. This code shall contain not more than 25 characters for a variant and not more than 35 characters for a version.
   
3. **(b)** Indicate whether the vehicle is suitable for use in either right or left-hand traffic or both right and left-hand traffic.
   
4. **(c)** Indicate whether the speedometer fitted has metric or both metric and imperial units.
   
5. **(d)** This statement shall not restrict the right of the Contracting Parties to require technical adaptations in order to allow the registration of a vehicle in a Contracting Party other than the one for which it was intended when the direction of the traffic is on the opposite side of the road.
   
6. **(e)** This entry shall be only completed when the vehicle has two axles.
   
7. **(f)** This mass shall include the mass of the driver. The actual mass may vary by 5% with respect to the mass stated in this entry.
   
8. **(g)** For hybrid electric vehicles, indicate both power outputs.
   
9. **(h)** Optional equipment under this letter can be added under entry ‘Remarks’.
   
10. **(i)** The codes described in Annex 7 Part A paragraph 2. shall be used.

11. **(j)** Indicate only the basic colour(s) as follows: white, yellow, orange, red, violet, blue, green, grey, brown or black.

12. **(k)** Excluding seats designated for use only when the vehicle is stationary and the number of wheelchair positions.

13. **(m)** Repeat for the various fuels which can be used. Vehicles, which can be fuelled with both petrol and gaseous fuel but where the petrol system is fitted for emergency purposes or starting only and of which the petrol tank cannot contain more than 15 litres of petrol, will be regarded as vehicles which can only run a gaseous fuel.
Appendix 1: Model translation sheet for the IWVTA document of fulfilment

It is envisioned that a translation sheet of the following structure is established for the IWVTA document of fulfilment for each vehicle category and for each language required by a Contracting Party. These translation sheets facilitate the use of IWVTA documents of fulfilment in the respective Contracting Parties without the need for translation of all the individual data of each vehicle.

Annex 7: Definition of the vehicle type

Part A: Vehicles of category M1

1. Definition of vehicle type, variant, and version

1.1 Vehicle type

1.1.1 A “vehicle type” shall consist of vehicles which have all of the following features in common:

(a) the manufacturer’s company name. A change in the legal form of ownership of the company does not require that a new approval has to be granted;
(b) the design and assembly of the essential parts of the body structure in the case of a self-supporting body. The same shall apply mutatis mutandis to vehicles the bodywork of which is bolted on or welded to a separate frame;

1.1.2 By way of derogation from the requirements of point 1.1.1(b), when the manufacturer uses the floor portion of the body structure as well as the essential constituent elements forming the front part of the body structure located directly in front of the windscreen bay, in the construction of different kinds of bodywork (for example a saloon and a coupe), those vehicles may be considered as belonging to the same type. Evidence thereof shall be provided by the manufacturer.

1.1.3 A type shall consist of at least one variant and one version.

1.2 Variant

1.2.1 A “variant” within a vehicle type shall group the vehicles which have all of the following construction features in common:

(a) the number of lateral doors or the type of bodywork as defined in paragraph 2 when the manufacturer uses the criterion of paragraph 1.1.2;
(b) the power plant with regard to the following construction features:
   (i) the type of energy supply (internal combustion engine, electric motor or other);
   (ii) the working principle (positive ignition, compression ignition or other);
   (iii) the number and arrangement of cylinders in the case of internal combustion engine (L4, V6 or other);
   (c) the number of axles;
   (d) the number, and interconnection of powered axles;
   (e) the number of steered axles;

1.3 Version

1.3.1 A “version” within a variant shall group the vehicles which have all the following features in common:

(a) the technically permissible maximum laden mass;
(b) the engine capacity in the case of internal combustion engine;
(c) the maximum engine power output or the maximum continuous
rated power (electric motor);
(d) the nature of the fuel (petrol, gas oil, LPG, bi-fuel or other);
(e) the maximum number of seating positions;
(f) drive-by sound level;
(g) exhaust emission level;
(h) combined or weighted, combined CO₂ emissions;
(i) electric energy consumption (weighted, combined);
(j) combined or weighted, combined fuel consumption;

2. **Types of bodywork**

The codes of vehicles of categories M1⁵ shall be used.

---

⁵As defined in the Consolidated Resolution on the Construction of Vehicles (R.E.3.), document ECE/TRANS/WP.29/78/Rev.2, paragraph 2.9.1. –
