Economic Commission for Europe  
Inland Transport Committee  
World Forum for Harmonization of Vehicle Regulations  

167th session  
Geneva, 10-13 November 2015  
Item 4.6.2 of the provisional agenda  
1958 Agreement – Consideration of draft amendments  
to existing Regulations submitted by GRE

Proposal for Supplement 7 to the 01 series of amendments to  
Regulation No. 98 (Headlamps with gas-discharge light  
sources)

Submitted by the Working Party on Lighting and Light-Signalling*

The text reproduced below was adopted by the Working Party on Lighting and  
Light-Signalling (GRE) at its seventy-third session (ECE/TRANS/WP.29/GRE/73, para.  
13). It is based on ECE/TRANS/WP.29/GRE/2015/15 and submitted to the World Forum  
for Harmonization of Vehicle Regulations (WP.29) and to the Administrative Committee  
AC.1 for consideration at their November 2015 sessions.

* In accordance with the programme of work of the Inland Transport Committee for 2012–2016  
(ECE/TRANS/224, para. 94 and ECE/TRANS/2012/12, programme activity 02.4), the World Forum  
will develop, harmonize and update Regulations in order to enhance the performance of vehicles. The  
present document is submitted in conformity with that mandate.
Paragraph 2.1.5., amend to read:

"2.1.5. Which light sources are energized when the various beam combinations are used and, in case of a light source category with more than one objective luminous flux value, which objective luminous flux value is used;"

Paragraph 2.1.6., amend to read:

"2.1.6. The category of light source as listed in Regulations Nos. 37 or 99 and their series of amendments in force at the time of application for type approval and, in case of a light source category with more than one objective luminous flux value, which objective luminous flux value is used for passing beam and for driving beam;"

Paragraph 6.1.3., amend to read:

"6.1.3. The headlamp shall be deemed satisfactory if the photometric requirements set in the present paragraph 6. are met with one light source, which has been aged during at least 15 cycles, in accordance with Annex 4, paragraph 4. of Regulation No. 99.

It shall be a standard (étalon) light-source approved according to Regulation No. 99 and its luminous flux may differ from the objective luminous flux specified in Regulation No. 99. In this case, the luminous intensities shall be corrected accordingly.

If a gas-discharge light source category is used with more than one objective luminous flux value, the applicant shall choose one of the objective luminous flux values as indicated in the relevant data sheet of Regulation No. 99 and a reference stating which objective flux was chosen for type approval shall be made in items 9.4.1. and 9.4.2. in the communication form of Annex 1."

Annex 1, insert new items 9.4.1. and 9.4.2. to read:

"9.4.1. If more than one objective luminous flux value is specified: Objective luminous flux value used for the principal passing beam...............................[lm]

9.4.2. If more than one objective luminous flux value is specified: Objective luminous flux value used for the driving beam................................. [lm]"
