Final report on Phase 1b on the development of UN Global Technical Regulation No. 16 on tyres – Amendment No. 1 to UN GTR No. 16

This report was prepared in accordance with Article 6, paragraph 6.2.4.2.1 of the 1998 Agreement. It describes the work done to complete the Phase 1b of UN GTR No. 16 on tyres.

A. Background

1. UN GTR No. 16 on tyres was established in the Global Registry on 13 November 2014. The informal working group on the Tyre GTR was challenged by reaching harmonization of technical provisions making those acceptable both for type approval and self-certification compliance assessment systems.

2. Meanwhile, in parallel to development of UN GTR No. 16, UN Regulation No. 117, which is a base for UN GTR No. 16, had been amended several times by inclusion of the provisions to tyre wet grip performance, rolling resistance and qualification for use at severe snow conditions for all tyre classes included in its scope. The other base UN Regulations Nos. 30 and 54 were also subjects to certain amendments, and the relevant provisions of UN GTR No. 16 became needed to be aligned.

3. As harmonization of the newly introduced provisions of UN Regulation No. 117 was not feasible in a reasonable time frame, the decision for draft UN GTR on tyres was not to consider those provisions for inclusion in the text of GTR at the time of its development.

4. As the aforesaid new provisions of UN Regulation No. 117, as well as those of UN Regulations Nos. 30 and 54 represent the state-of-the art level and are important for assessment of performance of tyres on the markets worldwide, at the 79th GRRF session the decision was made to prepare a draft amendment keeping in line the UN GTR on tyres with the latest regulatory developments (ECE/TRANS/WP.29/GRRF/79, para. 27).

5. The ETRTO agreed to prepare a draft Amendment No. 1 to UN GTR No. 16 considered as Phase 1b of the development of the UN GTR on tyres. The Government of the Russian Federation assumed the duties of the technical sponsor for that development.

6. The Executive Committee of the 1958 Agreement (AC.3) at its forty-fourth session adopted ECE/TRANS/WP.29/2015/70 tabled by the Russian Federation to request authorization to start work on developing the Amendment No. 1 to UN GTR No. 16.

B. Organization of process

7. The proposal for Amendment No. 1 to UN GTR No. 16 including the approved changes in the relevant FMVSS and supplements/corrigenda of UN Regulations was
drafted by the experts from ETRTO with the intention to make the proposed text neutral with regard to the compliance assessment schemes.

8. The draft document was reviewed by the interested experts at the informal meeting held on 25-26 June 2015 in the Palace of Nations in Geneva in conjunction with the 166th WP.29 session. The representatives from the Contracting Parties to the 1998 Agreement from Canada, EC, Egypt, Hungary, Portugal, Russian Federation, Spain, UK and US, the representatives from industry: ETRTO, JATMA, ITTAC and RMA and the representative from the UNECE secretariat participated to this meeting. The revision of the draft text reflecting the meeting deliverables together with the items requesting the GRRF guidance was presented at the 80th GRRF session.
