Financing of Transport Infrastructure Projects in the Czech Republic

Ondřej Kališ
The Czech Republic is the state in the central Europe.

- population: 10.5 mil. people; area: 78,866 km$^2$
- capital city: Prague
- length of motorways: 1,228 km
- length of roads: 54,600 km
- length of railways: 9,600 km
Sources of Road Financing

Financing of the transport infrastructure secures the State Fund for Transport Infrastructure.

For this year it is planned to put 83 mld. Kč (ca. 3 mld. €) into the transport infrastructure (roads, railways, waterways etc.).

Sources of these finances are:

- **national sources** – 76 %
- **European union (OPT)** – 23 %
- **CEF (Connecting Europe Facility)** – 1 %
- **PPP** – first project is in preparation
Road Financing in Numbers

In 2016 will start constructions of roads with estimated costs:

- new motorways and state roads – 27,6 mld. Kč (ca. 1 mld. €)
- modernization od motorway D1 – 4,2 mld. Kč (ca. 156 mil. €)
- reconstructions and maintenance of motorways – 3,2 mld. Kč (ca. 119 mil. €)
- reconstructions and maintenance of state roads – 9 mld. Kč (ca. 333 mil. €)
Reconstructions of Regional Roads

Since 2016 it is allowed to give state contributions for reconstructions of regional roads.

In 2016 the regions will receive 3 mld. Kč - it’s ca. 111 mil. € - for reconstructions of their small roads.
