

# Safe system approach

## Detailed and simplified illustrations

Donal Casey  
21/03/2016

presented to UNECE GE.1 on LC safety

# Level crossing 'safe system' approach

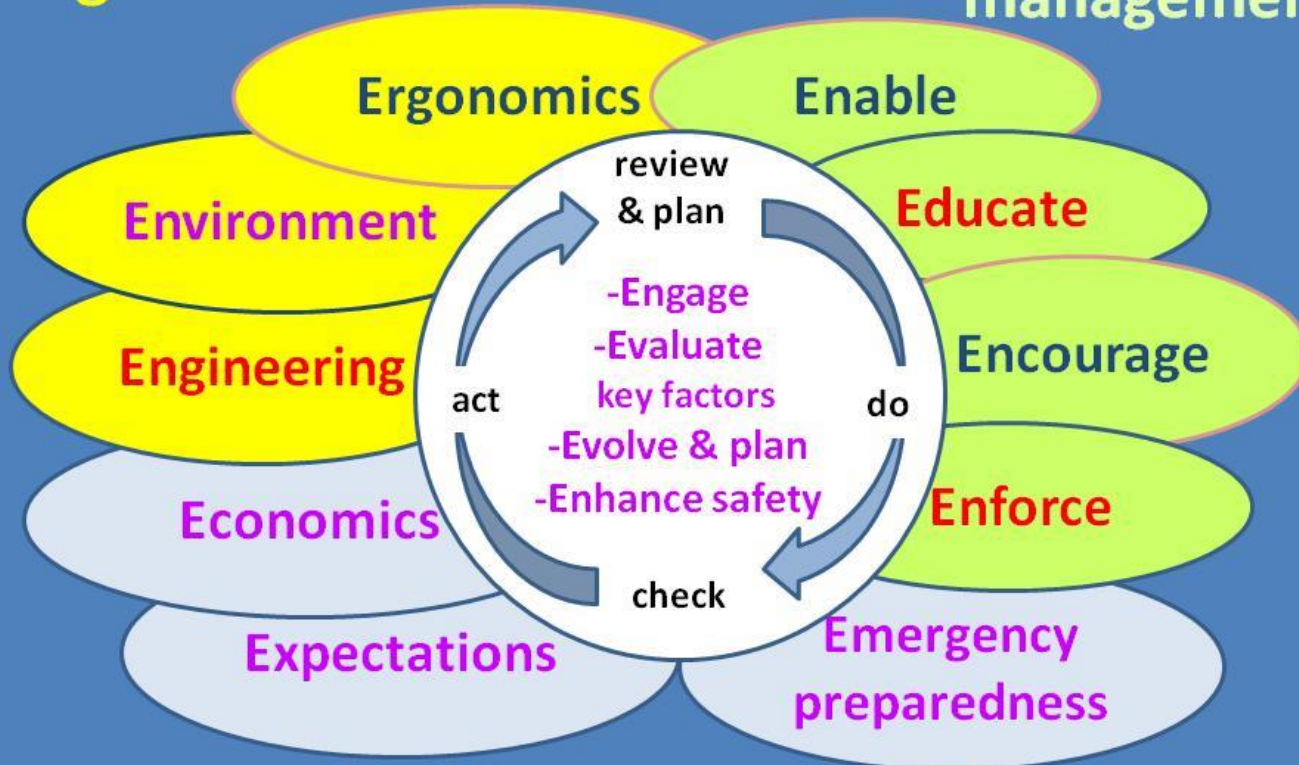

- holistic
- multi-disciplinary
- “safe by design” & “fit for purpose”
- empower users
- manage risks
- continual improvement
- enhance safety

# Original model

## Level crossing safe system

Infrastructure design & management

User behaviour management

National policy & law

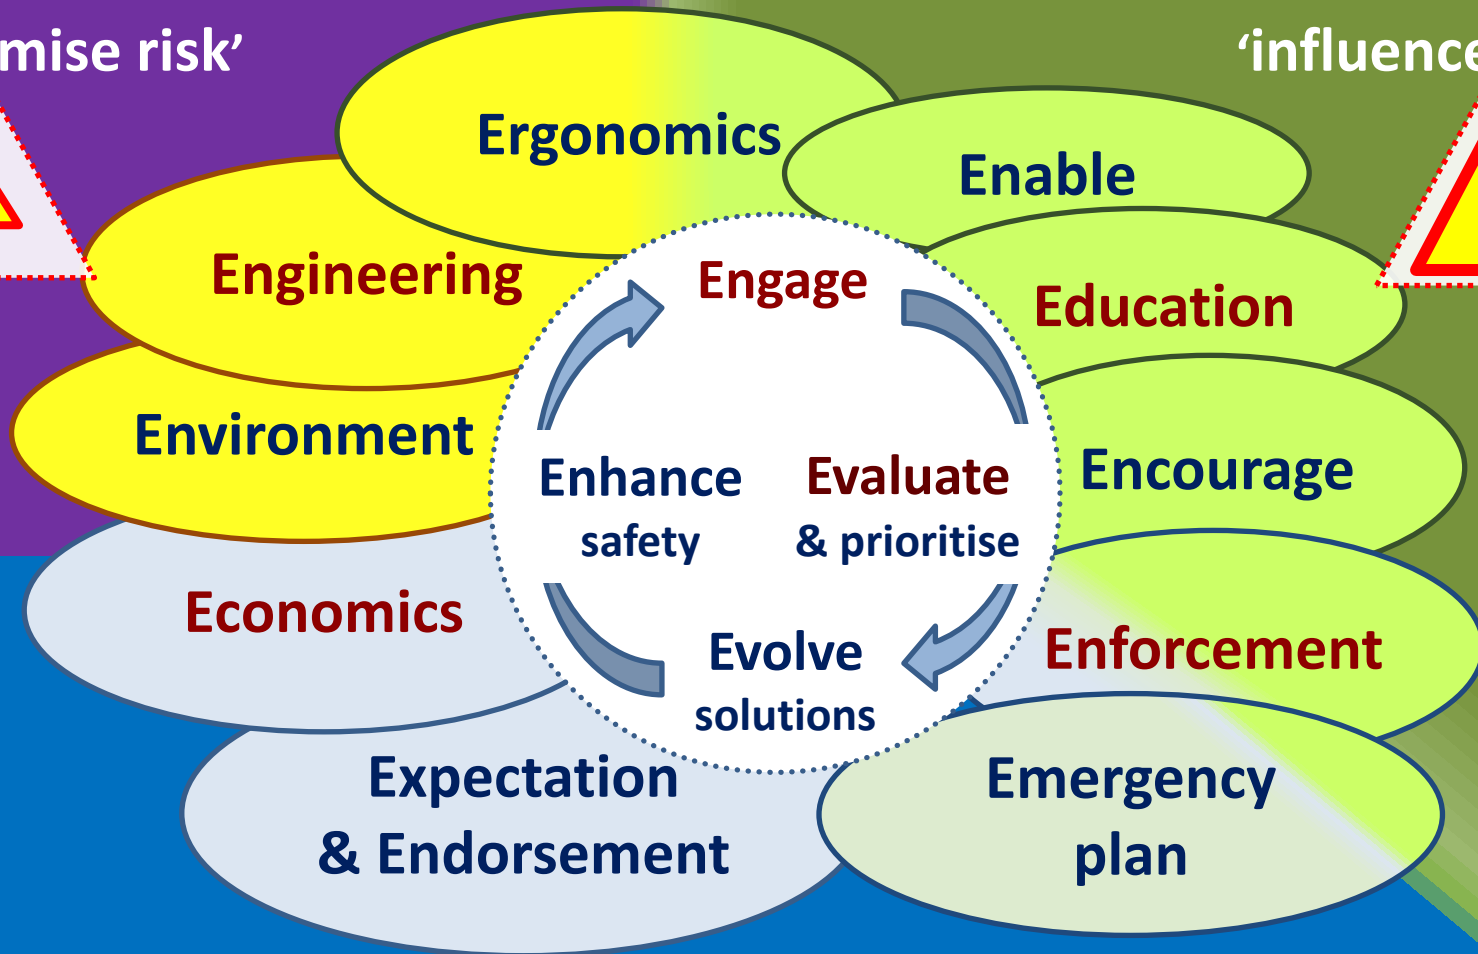

# Level Crossing Safe System approach

Design management

Behaviour management

'minimise risk'

'influence risk'

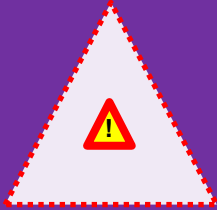

National policy & law - 'address risk'

# Level Crossing Safe System approach (basic)

Design management

'minimise risk'

**Engineering**

Behaviour management

'influence risk'

**Education**

**Engage**  
to assess risk

**Economics**

**Enhance**  
safety

**Evaluate**  
& Prioritise

**Evolve**  
solutions

**Enforcement**

National policy & law- 'address risk'
