UNIFYING HUMAN SYMBOLS IN VIENNA CONVENTION

Prepared For The UNECE Secretarial

By: Adel Alyousifi

Feb. 2016
Introduction

- Vienna Convention has 31 signs with human symbols
- Signs warn drivers of presence of pedestrian or children on the road
- Signs prohibit pedestrian or certain type of vehicles on a section of the road
- Signs direct and orders drivers or pedestrian to obey certain rules while they use the roads.
- These 31 signs or symbols cover many roads situations.

But they are not enough!
The Goal

To unify and standardize symbols and signs to reduce cost and increase safety level on the roads.
Vienna Convention’s Signs and symbols with human pictograms.
Non-uniformity of signs and symbols in Vienna Convention.
we strongly oppose to place signs with human symbols on the road and pathways, this act will undervalue human life. We also stated this in our presentation to the committee in first meeting on March, 2014.
