

Amendment to ECE/TRANS/WP.29/GRRF/2016/28

Agreed during the 82nd session

...

Insert a new paragraph 4.8.

"4.8. Towing brackets / drawbeams which are intended to tow trailers up to 3.5t shall incorporate attachment points, to which either secondary couplings or devices necessary to enable the trailer to be guided and/or stopped automatically in the event of separation of the main coupling, may be attached.

Other than for detachable units, As an alternative, an attachment point may be integrated to coupling component fitted to the towing bracket/drawbeam.

The installation and operating instructions specified in 4.6. shall include all the information for the correct use these attachment points."
