

Remarks to the Collective amendments to Regulations Nos. 16, 44, 94 and 129 (Enhanced Child Restraint Systems)

(ECE /TRANS/WP.29/GRSP/2015/30)

Hungary fully agrees with the proposal to harmonize information in the airbag warning label on the correct installation of Child Restraint Systems (CRS).

On the other hand, because the proposal for the harmonized graphical appearance and dimensions has only an indirect impact to the safety level, a reasonable transitional period should be allowed for its implementation.

Justification: A reasonable transition period helps to avoid additional costs and administration loads for the industry.
