## Economic Commission for Europe

### Inland Transport Committee

#### Seventy-ninth session

Geneva, 21-24 February 2017

Item 5 (k) of the provisional agenda

#### Strategic questions of a modal and thematic nature:

#### Transport statistics and data

## Transport statistics Infocards

### Note by the secretariat

### Background

The Working Party on Transport Statistics continues its activities in providing key data to inform the ITC on developments in the inland transport sector, as well as to facilitate the work of other Working Parties and individual member States.

In an effort to make this information more readily available and in a format that can be used more easily, the secretariat has prepared country profiles (Infocards). The infocards set out key transport indicators including passenger and freight volumes, modal split and road safety related data for UNECE member States. The Infocards are available for download on the UNECE website ([www.unece.org/trans/main/wp6/infocards.html](http://www.unece.org/trans/main/wp6/infocards.html)) as one package or as individual country files and can be viewed in Informal Document No. 6.

The data contained in these Infocards is based primarily on information available in the UNECE transport statistics database available online and has been supplemented by national specific information provided by member States.
