The importance of the type definition in the UN Regulation No. 67 type-approval process

This presentation concerns the proposal for Supplement 15 to the 01 series of amendments to Regulation No. 67 (LPG vehicles), submitted by the expert from Poland ECE/TRANS/WP.29/GRSG/2017/10

UN Regulation 67 type approval concerns:
• Container,
• 80 per cent stop valve,
• Pressure regulator,
• Pressure relief valve (discharge valve),
• Remotely controlled service valve with excess flow valve and so on, up to the position 23….

The result of the "competition":
Definition OK! No definition!

1 : 22
Type – approval of:

**Container**

Accessories:
- Multivalve
- PRV and fusible plug
- 80% STOP VALVE

**Container** with accessories:
- PRD verification and the bonfire test
- 80% stop valve verification
- and so on…

• VERSION A
• VERSION B
• VERSION C
• VERSION D

[APPROVED ACCESSORIES] + [APPROVED CONTAINER]
Proposals is aimed to specify the limits of container accessories construction changes carried out in the framework of one type of approved devices, especially for the modifications, which are essential for the approval of a LPG container.

Thank you for your attention
