

## **Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals**

19 November 2018

### **Sub-Committee of Experts on the Transport of Dangerous Goods**

#### **Fifty-fourth session**

Geneva, 26 November-4 December 2018

Item 2 (e) of the provisional agenda

#### **Recommendations made by the Sub-Committee on its fifty-first, fifty-second and fifty-third sessions and pending issues: transport of gases**

### **Addendum to ST/SG/AC.10/C.3/2018/66 update of LC<sub>50</sub> values in P200**

**Transmitted by the International Organisation for Standardisation  
(ISO)**

#### **Introduction**

1. Document ST/SG/AC.10/C.3/2018/66 proposes new LC<sub>50</sub> values for eight gases. If these proposals are accepted for UN 2196 Tungsten hexafluoride and UN 2198 Phosphorous pentafluoride there will be consequential amendments in P200. The new values for these two gases are in excess of 200 ml/m<sup>3</sup> which means they are no longer subject to special packing provision 'k' as defined in P200 (5).

#### **Consequential amendment**

2. In 4.1.4.1 P200 in the final column of Table 2 headed "Special packing provisions" delete "k" for the entry for UN 2196 Tungsten hexafluoride and for the entry for UN 2198 Phosphorous pentafluoride (twice).
