

Enhanced International Driving Permit

Cost & Benefit Report

77th Session of the Global Forum for Road Safety, UNECE
18 September

Benefits

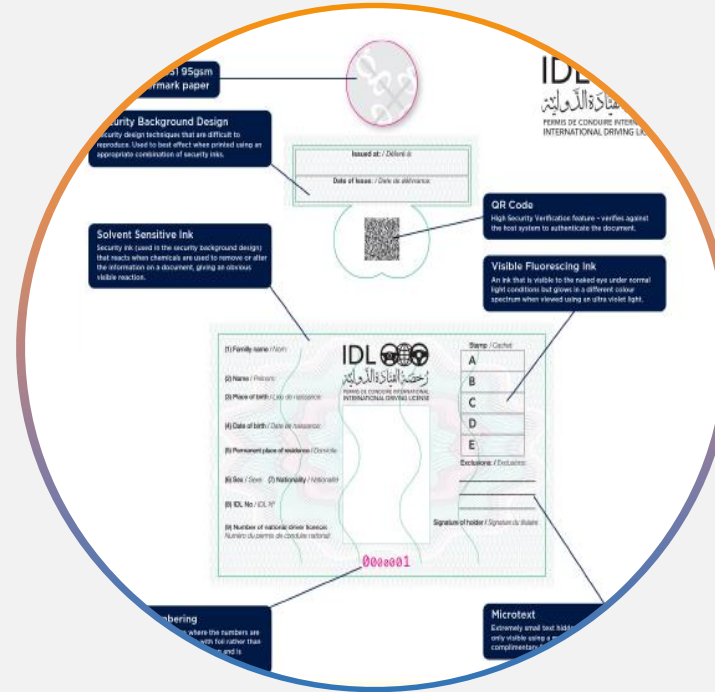

Enhanced Security Features

The new IDL format has adopted a high level security features including: booklet security, security label and secure digital input system combined with QR code and verification process

Digital processing system

The digitalized IDP input system facilitates the registry and tracking of the specific document. The Digital Application process has reduced the application processing time by 30%

Environmental Impact

Reduced Carbon footprint as a result of introducing online application and reducing traditional paper application
Total Saving in paper waste- 18.588 kg

Production Cost

IDP Marginal Cost

- £1.30 GBP per unit of IDP for the total quantity of 50.000 units printed
- £1.10 GBP per unit of IDP for the total quantity of 100.000 units printed
- £1 GBP per unit of IDP for the total quantity of 200.000 units printed
- £0.88 GBP per unit of IDP for the total quantity of 500.000 units printed

Recommendations

- Cost of the IDP can be adjusted depending on final choice of IDP security features
- Harmonization of IDP format internationally will facilitate document production and decrease the marginal cost
- IDP Digital Management Software will enhance and ease the control, verification and tracking of the IDP issued
- Consistent practice of user awareness about IDP document will decrease quantity of illegal parties issuing fraudulent document

Driving Without an IDP
