Amendment to UN Regulation No. 137 (Frontal impact with focus on restraint systems)

Submitted by the expert from the European Commission

The text reproduced below was prepared by the expert from the European Commission to expand the scope of the Regulation, to provide appropriate transitional provisions and to make minor adaptations and clarifications to the existing requirements. The modifications to the current text of the UN Regulations are marked in bold for new or strikethrough for deleted characters.

I. Proposal for Supplement X to the 01 series of Amendments to UN Regulation No. 137 (Uniform provisions concerning the approval of passenger cars in the event of a frontal collision with focus on the restraint system)

Paragraph 1., amend to read:

"1. Scope

This Regulation applies to vehicles of category M₁,¹ with a maximum permissible mass below 3.5 tonnes not exceeding 3 500 kg and to vehicles of category N₁; other vehicles may be approved at the request of the manufacturer."

Paragraph 5.2.5.1., amend to read:

"5.2.5.1. To open at least one door, if there is one, per row of seats and, where there is no such door, to move activate the displacement system of the seats in front or tilt their backrests as necessary, in absence of an escape path towards the row in front of at least 550 mm width and 1 100 mm height between the vehicle floor and roof, to allow the evacuation of all the occupants; this is, however, only applicable to vehicles having a roof of rigid construction;"

Insert new paragraphs 11.5 to 11.7., to read:

"11.5 As from the official date of entry into force of Supplement X to the 01 series of amendments, no Contracting Party applying this Regulation shall refuse to grant or refuse to accept type approvals under this Regulation as amended by Supplement X to the 01 series of amendments.

11.6 Notwithstanding the transitional provisions above, as from [1 May] 2022, Contracting Parties applying this Regulation may refuse to grant type

¹ As defined in the Consolidated Resolution on the Construction of Vehicles (R.E.3.), document ECE/TRANS/WP.29/78/Rev.6, para. 2
approval of new types of vehicle of category N₁ which do not comply with this Regulation.

11.7 Notwithstanding the transitional provisions above, as from [1 May] 2024, Contracting Parties applying this Regulation may refuse recognise type approval of vehicles of category N₁, which do not comply with this Regulation.”

II. Justification

1. The European Union is in the process of adopting the revised General Safety Regulation that introduces a range of new safety features. It however also addresses a number of exemptions regarding essential vehicle safety requirements for e.g. light commercial vehicles such as vans.

2. These exemptions can no longer be justified in the light of protection of workers that use light commercial vehicles.

3. The envisioned application dates that have been decided by the European Parliament and EU Member States are also proposed in new transitional provisions for this Regulation.

4. In wide vehicles it may be not necessary for the front seats to have a displacement system (in accordance with Regulation 17), as occupants can move forward between the seats. It is proposed to allow this also in this Regulation to allow for the evacuation of rear-seated occupants through a front door in case of a crash.

5. To avoid diverging interpretations by Technical Services and Type-Approval Authorities it is clarified that at least a worst-case configuration as regards side doors must be assessed to prevent that certain configurations would somehow not be checked.
