Operationalization of Euro-Asian Transport Links
Operationalization of Euro-Asian Transport Links

Mandate: WP.5 to continue its work on the operationalization of Euro-Asian Transport Corridors and other transport corridors

Operationalization – infrastructure connections and interoperability standards, efficient corridor management, harmonization and simplification of border-crossing formalities and administrative formalities, application of new technologies and digitalization
Operationalization of Euro-Asian Transport Links

SC.2 involvement through AGC and its work on rail transport

Operationalization – infrastructure connections and interoperability standards, efficient corridor management, harmonization and simplification of border-crossing formalities and administrative formalities, application of new technologies and digitalization
Operationalization of Euro-Asian Transport Links

What do we know? (source EATL phase III project)

Links need to:
- be competitive
- meet the requirements of modern supply chains

Physical and non-physical gaps are obstacles to meeting the objectives
Operationalization of Euro-Asian Transport Links

Requested follow-up
Provide ideas on how to enhance operationalization of Euro-Asian Transport links

Operationalization – infrastructure connections and interoperability standards, efficient corridor management, harmonization and simplification of border-crossing formalities and administrative formalities, application of new technologies and digitalization
Exchanges at the forum:
United Nations transport legal instruments offer the necessary basis for countries to improve sustainable transport connectivity; this requires accession to and implementation of these instruments.

Infrastructure bottlenecks exist among others in the context of infrastructure failure due to extraordinary conditions and need to be addressed by infrastructure adaptation to changing conditions and/or construction of alternative paths.

Digitalization of transport documents, innovation in railways and increasing railway competitiveness vis-à-vis other transport modes remain top challenges.

Unified Railway Law can be instrumental in improving rail competitiveness, laws such as on contract for carriage of goods by rail between Europe and Asia or seamless crossing of borders by rolling stock were referred to.
