## I. Proposal

*Paragraph 3.1.8.*, amend to read:

"3.1.8. For vehicles of categories L<sub>6</sub>, L<sub>7</sub>, M, N, O, T, R and S, the vehicle manufacturer shall provide a statement of frequency bands, power levels, antenna positions and installation provisions for the installation of radio frequency transmitters (RF-transmitters), even if the vehicle is not equipped with an RF transmitter at time of type approval, **and this statement shall be noted in the information document (e.g. under item 63, Annex 2A)**. This should cover all mobile radio services normally used in vehicles. This information shall be made publicly available following the type approval.

Vehicle manufacturers shall provide evidence that vehicle performance is not adversely affected by such transmitter installations. "

## II. Justification

In order to ensure uniform application of the requirements, not only for type approval, but also for enabling compliance checks and enforcement (e.g., for conformity of production), it is proposed to consider an addition to the text of paragraph 3.1.8., requesting that the required statement provided by the vehicle manufacturer should also be noted in the information document.
