

Recommended UN-R152 implementation

- **Unlike other regulations** the AEBS requirements are based **on development outlook** rather than technical knowhow at the time of drafting.
- **Implementation and validation of the necessary adaptations** to meet the requirements of UN-R152 requires **sufficient lead time**.
- When UN-R152 was drafted, OICA/CLEPA participated in the discussion, **assuming this lead time will be given**.
- Moving forward, **sooner implementation dates** will make **compliance across all vehicle models** extremely difficult and **may result in a temporary limited offer**.
- OICA/CLEPA therefore recommend to request compliance with the provisions of UN-R152 no earlier than:

	New Types not before	New Registrations not before
Car2Car	July 2022	July 2024
Car2Pedestrian	July 2024	July 2026
Car2Bicycle	July 2024	July 2028 (as proposed by the 2-Step Approach)
