INLAND TRANSPORT COMMITTEE

Working Party on Road Traffic Safety
(Forty-third session, 22 – 25 September 2003,
agenda item 7)

**COLLECTION AND DISSEMINATION OF INFORMATION ON NATIONAL
REQUIREMENTS CONCERNING ROAD TRAFFIC SAFETY**

Note by the secretariat

1. The present consolidated document is an update of TRANS/WP.1/80/Rev.1. It contains revised information transmitted by Governments in response to a request from the secretariat to member States. The new information appears in bold.
2. The categories of vehicles referred to in this document are those specified in annexes 6 and 7 of the Convention on Road Traffic (Vienna, 1968) i.e.:

Category A: Motor cycles.

B: Motor vehicles, other than those in category A, having a permissible maximum mass not exceeding 3,500 kg and not more than eight seats in addition to the driver's seat.

C: Motor vehicles used for the carriage of goods and whose permissible maximum mass exceeds 3,500 kg.

- D: Motor vehicles used for the carriage of passengers and having more than eight seats in addition to the driver's seat.
- E: Combinations of vehicles of which the drawing vehicle is in a category or categories for which the driver is licensed (B, and/or C and/or D), but which are not themselves in a category or categories.

3. It should be noted that special speed limits are often imposed either on account of the nature of the vehicles or combination of vehicles concerned, or on account of the nature of the transport operation performed or of some particular provisions which are applicable to the person of the driver. Special speed limits of this kind have not been indicated in the tables.

- 2/ Speed which drivers are recommended not to exceed.
- 3/ Higher permissible speeds may be indicated by road signs.
- 4/ Separate lanes in each direction separated by physical means.
- 5/ (i) Speed is limited for drivers having less than two years of driving experience to 70 km/h on all roads.
(ii) Notwithstanding the permissible driving speed, it is prohibited to exceed the design speed of the vehicle.
(iii) Towing speed should not exceed 50 km/h.
- 6/ Motor cycles with engine capacity up to 149 cc and motor cycles with sidecar having engine capacity up to 249 cc are prohibited on motorways; 90 km/h on other roads.
- 7/ On roads with two separate carriageways, without intersections, not classified as motorways, speed is limited to 110 km/h.
- 8/ [...]
- 9/ The speed of mopeds is limited by design. The values indicated are for motorcycles with engine capacity exceeding 80 cc. For motor cycles with engine capacity equal or below 80 cc their maximum speed is limited by design to 75 km/h. In case of rain or snowfalls the maximum speed limits are reduced to: 110 km/h (instead of 130 km/h); 100 km/h (instead of 110 km/h) and 80 km/h (instead of 90 km/h).
- 10/ Minimum speed on motorways (category 1) for all vehicles: 40 km/h.
- 11/ Mopeds' speed limited to 48 km/h (30 mph) by Federal Motor Vehicle Performance Standards. Each State has the option of allowing up to 104 km/h (65 mph) on rural highways signed as part of the Interstate System and on rural highways with full access control which connect to the Interstate.
- 12/ The speed of mopeds is limited to 50 km/h by design.
- 13/ The speed of mopeds is limited to 45 km/h by design (50 km/h for mopeds type approved before 1 October 1996).
- 14/ Higher permissible speed (particularly 90 or 100 km/h on roads of category 1 and 90 km/h on roads of category 2) may be indicated by road signs.
- 15/ Notwithstanding the permissible driving speed, it is prohibited to exceed the design speed of the vehicles.
- 16/ On express roads with one carriageway, speed is limited to 100 km/h.
- 17/ On roads with two separate carriageways, speed is limited to 100 km/h.
- 18/ On roads with two separate carriageways, speed is limited to 80 km/h.
