
This Directive primarily concerns provisions for the limiting and testing of tyre noise and for the phased reduction of the permitted noise levels. However, these values are conditional upon a report, which is to be prepared, looking at whether the noise reductions can be achieved without compromising safety. To this end, the work being carried out on tyre grip within GRRF will be of great assistance. A timetable is proposed for further amendments to the directive.

The full text for this Directive 2001/43/EC can be found in the Official Journal of the European Commission No. L211 of 4th August 2001, or at the following address:

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 95 thereof,

Having regard to the proposal from the Commission (1),

Having regard to the opinion of the Economic and Social Committee (2),

Acting in accordance with the procedure referred to in Article 251 of the Treaty (3), in the light of the joint text approved by the Conciliation Committee on 21 March 2001,

Whereas:

(1) Measures should be adopted for the purpose of ensuring the smooth functioning of the internal market.

(4) Article 4(2) of Council Directive 92/97/EEC of 10 November 1992 amending Directive 70/157/EEC relating to the permissible noise level and exhaust system of motor vehicles (6), states that any subsequent action intended, in particular, to reconcile the safety requirements with the need to limit the noise arising from contact between tyres and road surfaces will be adopted on the basis of a proposal from the Commission which will take account of the studies and research to be conducted in connection with that source of noise.

(5) A realistic, reproducible method enabling the noise arising from contact between tyres and road surfaces to be measured has been developed; on the basis of that new method of measurement, a study has been carried out in order to produce a numerical value for the sound level representing the tyre-road noise generated by various types of tyres fitted to various types of motor vehicle.

(6) It is to be acknowledged, when setting tyre-rolling noise requirements, that tyres are designed taking into account parameters relating to safety and environment and that a constraint on one parameter can affect the other parameters; it should also be acknowledged, when setting tyre-rolling noise requirements, that there is an ongoing development of international standards relating to road surface undertaken by the International Organisation for Standardisation (ISO) and to endurance and safety requirements relating to tyres undertaken by the United Nations Economic Commission for Europe.

(8) The measures necessary for the implementation of this Directive should be adopted in accordance with Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission (7).

HAVE ADOPTED THIS DIRECTIVE:

Article 1

Directive 92/23/EEC shall be amended as follows:

1. ‘EEC component type-approval’, ‘EEC type-approval’ and ‘EEC approval’ shall be replaced in every instance by the term ‘EC type-approval’;

2. in Article 1, the first indent, shall read as follows:

‘— “tyre” means any new pneumatic tyre including a winter tyre with holes for studs, in the form of original equipment or of a replacement, intended to be fitted to vehicles to which Directive 70/156/EEC applies. This definition does not cover winter tyres with studs’

3. the following Article shall be inserted:

‘Article 1a

1. The requirements set out in Annex V shall apply to tyres intended to be fitted to vehicles first used on or after 1 October 1980.

2. The requirements set out in Annex V shall not apply to:
   (a) tyres whose speed rating is less than 80 km/h;
   (b) tyres whose nominal rim diameter does not exceed 254 mm (or code 10) or is 635 mm or more (code 25);
   (c) T type temporary use spare tyres as defined in 2.3.6 of Annex II;
   (d) tyres designed only to be fitted to vehicles registered for the first time before 1 October 1980;’

4. Article 2 shall be replaced by the following:

‘Article 2

1. Member States shall grant EC type-approval, under the conditions laid down in Annex I, to all types of tyres meeting the requirements of Annex II, and shall allocate to these an approval number as specified in Annex I.

2. Member States shall grant EC type-approval, under the conditions laid down in Annex I, to all types of tyres meeting the requirements of Annex V and shall allocate to these an approval number as specified in Annex I.

3. Member States shall grant EC type-approval to all vehicles in respect of their tyres under the conditions laid down in Annex III, where those tyres (including spare tyres, where appropriate) meet the requirements of Annex II and the requirements concerning vehicles laid down in Annex IV, and shall allocate to any such vehicle an approval number as specified in Annex III.

5. the List of Annexes and the Annexes shall be amended in accordance with the Annex to this Directive;

6. the following Article shall be inserted:

‘Article 10a

1. As from 4 February 2003, Member States may not:
   (a) refuse to grant EC type-approval or national approval for a type of vehicle or type of tyre, or
   (b) prohibit the registration, sale or entry into service of vehicles, and the sale or entry into service or use of tyres,
   for reasons relating to the tyres and their fitting to new vehicles, if the vehicles or tyres comply with the requirements laid down in this Directive, as amended by Directive 2001/43/EC (*)

2. As from 4 August 2003, Member States may no longer grant EC type-approval, and shall refuse to grant national type-approval for those types of tyre which fall within the scope of this Directive and which do not meet the requirements of this Directive, as amended by Directive 2001/43/EC.

3. As from 4 February 2004, Member States may no longer grant EC type-approval or national approval for a type of vehicle, for reasons relating to its tyres or their fitting, if the requirements of this Directive, as amended by Directive 2001/43/EC, are not met.

4. As from 4 February 2005, Member States shall:
   (a) consider certificates of conformity accompanying new vehicles in accordance with the provisions of Directive 70/156/EEC as being no longer valid for the purposes of Article 7(1) of the said Directive, if the requirements of this Directive, as amended by Directive 2001/43/EC, are not met, and
   (b) refuse the registration or prohibit the sale or entry into service of new vehicles which do not meet the requirements of this Directive, as amended by Directive 2001/43/EC.

5. As from 1 October 2009, the provisions of this Directive, as amended by Directive 2001/43/EC, shall apply for the purposes of Article 7(2) of Directive 70/156/EEC, to all tyres which fall within the scope of this Directive, with the exception of tyres of classes C1d and C1e, to which they shall apply as from 1 October 2010 and 1 October 2011 respectively.

Article 2

1. Member States shall bring into force the laws, regulations and administrative provisions necessary in order to comply with this Directive before 4 August 2002. They shall forthwith inform the Commission thereof.

They shall apply these provisions from 4 February 2003 at the latest.

2. When Member States adopt the measures referred to in paragraph 1, they shall contain a reference to this Directive or shall be accompanied by such a reference on the occasion of their official publication. The methods of making such a reference shall be laid down by the Member States.

3. Member States shall communicate to the Commission the text of the main provisions of national law which they adopt in the field covered by this Directive.
Article 3
1. By 4 August 2003 at the latest, an amendment to Directive 92/23/EEC shall be adopted in accordance with the procedure referred to in Article 4(2) in order to introduce grip tests for tyres.

2. In the light of the experience gained from the introduction of limit values for tyre noise, the Commission shall, within 36 months after the entry into force of this Directive, submit to the European Parliament and the Council a report concerning whether and to what extent technical progress would, without compromising safety, allow the introduction of the limit values indicated in Annex V, section 4.2.1., columns B and C, of Directive 92/23/EEC, as amended by this Directive. On the basis of this report, the Commission shall within 12 months propose an amendment of Directive 92/23/EEC, with a view to introducing provisions relating to safety, environmental and rolling resistance aspects.

Article 4
1. The Commission shall be assisted by the Committee for Adaptation to Technical Progress set up by Article 13 of Directive 70/156/EEC, hereinafter referred to as ‘the Committee’.

2. Where reference is made to this paragraph Articles 5 and 7 of Decision 1999/468/EC shall apply, having regard to the provisions of Article 8 thereof.

The period laid down in Article 5(6) of Decision 1999/468/EC shall be set at three months.

3. The Committee shall adopt its rules of procedure.

Article 5
This Directive shall enter into force on the day of its publication in the Official Journal of the European Communities.

Article 6
This Directive is addressed to the Member States.

For the European Parliament
The President
N. FONTAINE

For the Council
The President
B. ROSENGREN
ANNEX V

TYRE/ROAD NOISE EMISSION

1. SCOPE

This annex applies to the EC type-approval of tyres, as components, in respect of tyre/road noise emissions.

2. DEFINITIONS

For the purposes of this Annex, the definitions of Annex II shall apply, except for the definition under section 2.1., which shall read as follows:

2.1. “Type of tyre”

means, in relation to type-approval pursuant to this Annex (tyre/road noise emission), a range of tyres consisting of a list of tyre size designations (see section 2.17 in Annex II), brand names, trade marks and trade descriptions which do not differ in such essential characteristics as:
— the manufacturer's name
— the tyre classification (see section 2.4. of this Annex)
— the tyre structure (see section 2.1.4. of Annex II)
— the category of use (see section 2.1.3. of Annex II)
— for class C1 tyres. Reinforced or Extra Load
— the tread pattern (see 2.3 of Information Document, Annex I, Appendix 3).

Note: The effect of changes in minor details of tyre tread and construction on the tyre/road noise emission will be determined during checks on the conformity of production.

In addition, the following definitions shall also apply:

2.2. “Brand name or trade description”

means the identification for the tyre as provided by the tyre manufacturer. The brand name may be the same as the manufacturer and the trade description may coincide with the trade mark.

2.3. “Tyre/road noise emission”

means the noise arising from the contact between tyres in motion and the road surface.

2.4. For the purpose of this Annex, the following classification shall apply:

<table>
<thead>
<tr>
<th>Class</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C1</td>
<td>passenger car tyres (see section 2.32. of Annex II);</td>
</tr>
<tr>
<td>C2</td>
<td>commercial vehicle tyres (see section 2.33. of Annex II) with load capacity index in single formation ≤ 121 and speed category symbol ≥ “N” (see section 2.29.3. of Annex II);</td>
</tr>
<tr>
<td>C3</td>
<td>commercial vehicle tyres (see section 2.33. of Annex II) with load capacity index in single formation ≤ 121 and speed category symbol ≤ “M” (see section 2.29.3. of Annex II) or commercial vehicle tyres (see section 2.33. of Annex II) with load capacity index in single formation ≥ 122.</td>
</tr>
</tbody>
</table>

3. MARKING REQUIREMENTS

3.1. In addition to other marking requirements given in section 4 of Annex I and section 3 of Annex II, the tyre must bear the following markings:

3.1.1. the manufacturer's name or trade mark; the brand name, the trade description or the trade mark.

4. TYRE/ROAD NOISE EMISSION REQUIREMENTS

4.1. General requirements

A set of four tyres bearing the same tyre size designation and tread pattern that is representative of the range of tyres, shall be submitted to a tyre/road noise emission level test to be carried out as specified in Appendix 1.

4.2. The noise levels determined in accordance with section 4.5 of Appendix 1 shall not exceed the following limits:

4.2.1. Class C1 tyres, with reference to the nominal section width (see Annex II, section 2.17.1.1.) of the tyre that has been tested:
<table>
<thead>
<tr>
<th>Tyre Class</th>
<th>Nominal section width (mm)</th>
<th>Limit values in dB(A)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>A</td>
</tr>
<tr>
<td>C1a</td>
<td>≤ 145</td>
<td>72 (*)</td>
</tr>
<tr>
<td>C1b</td>
<td>&gt; 145 ≤ 165</td>
<td>73 (*)</td>
</tr>
<tr>
<td>C1c</td>
<td>&gt; 165 ≤ 185</td>
<td>74 (*)</td>
</tr>
<tr>
<td>C1d</td>
<td>&gt; 185 ≤ 215</td>
<td>75 (**)</td>
</tr>
<tr>
<td>C1e</td>
<td>&gt; 215</td>
<td>76 (***)</td>
</tr>
</tbody>
</table>

(*) Limit values in column A shall apply until 30 June 2007; limit values in column B shall apply as from 1 July 2007.

(**) Limit values in column A shall apply until 30 June 2008; limit values in column B shall apply as from 1 July 2008.

(***) Limit values in column A shall apply until 30 June 2009; limit values in column B shall apply as from 1 July 2009.

(1) Indicative figures only. Definitive figures will depend on amendment of the Directive following the report required in Article 3(2) of Directive 2001/43/EC.

(2) Limit values for column C will result from the amendment of the Directive following the report required in Article 3(2) of Directive 2001/43/EC.

4.2.1.1. For reinforced (or Extra Load) tyres (see Annex II, section 3.1.8.), the limit values in section 4.2.1. shall be increased by 1 dB(A).

4.2.1.2. For tyres classified in category of use "Special", (see Annex II, section 2.1.3.), the limit values in section 4.2.1. shall be increased by 2 dB(A).

4.2.2. Class C2 tyres with reference to the category of use (see Annex II, section 2.1.3.) of the range of tyres:

<table>
<thead>
<tr>
<th>Category of use</th>
<th>Limit value expressed in dB(A)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>75</td>
</tr>
<tr>
<td>Snow</td>
<td>77</td>
</tr>
<tr>
<td>Special</td>
<td>78</td>
</tr>
</tbody>
</table>

4.2.3. Class C3 tyres, with reference to the category of use (see Annex II, section 2.1.3.) of the range of tyres:

<table>
<thead>
<tr>
<th>Category of use</th>
<th>Limit value expressed in dB(A)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>76</td>
</tr>
<tr>
<td>Snow</td>
<td>78</td>
</tr>
<tr>
<td>Special</td>
<td>79</td>
</tr>
</tbody>
</table>

Appendix 1

TEST METHOD FOR TYRE-ROAD SOUND LEVELS COAST-BY METHOD

0. Introduction

The presented method contains specifications on measuring instruments, measurement conditions and the measurement method, in order to obtain the noise level of a set of tyres mounted on a test vehicle rolling at high speed on a specified road surface. The maximum sound pressure level is to be recorded, when the test vehicle is coasting, by remote-field microphones; the final result of a reference speed is obtained from a linear regression analysis. Such test results cannot be related to tyre noise measured during acceleration under power or deceleration during braking.
