A. MANDATE

1. The Working Party, at its forty-first session, decided to consider at its next session amendment proposals to the AGTC Agreement relating to intermodal Euro-Asian transport links and alignment of the AGTC network with that of the European Agreement on Main International Railway Lines (AGC) (TRANS/WP.24/103, paragraph 9).

1 ECMT and UNECE have adopted cooperative arrangements in establishing the “Joint ECMT/UNECE Working Party/Group on Intermodal Transport and Logistics” consisting of separate ECMT and UNECE segments, the UNECE segment consisting of its Working Party on Intermodal Transport and Logistics (WP.24).
2. At its forty-second session, the Working Party considered in detail amendment proposals to Annexes I and II of the AGTC Agreement as compiled and consolidated by the secretariat (TRANS/WP.24/2004/6). Noting that some of the required information, particularly with regard to the location of important terminals, had not yet been forthcoming, the Working Party invited concerned countries to transmit this information as soon as possible to the secretariat in order to be able to formally adopt these amendment proposals (in accordance with article 15 of the AGTC Agreement) at its forthcoming session in March 2005. In this context, the importance of developing a coherent pan-European network, covering also that of the OSZhD and proving, in particular, a consistent numbering system of combined transport lines, was stressed (TRANS/WP.24/105, paras. 9 and 10).

3. In addition, the secretariat has received amendment proposals to Annexes I and II to the AGTC Agreement from a number of Contracting Parties with a view to bringing the AGTC network and its related installations up-to-date.

B. AMENDMENT PROPOSALS TO ANNEXES I AND II OF THE AGTC AGREEMENT

4. Based on the railway lines of major international importance enshrined in the AGC Agreement\(^2\) and taking account of specific proposals made by some UNECE member countries, the secretariat has compiled below a list of amendment proposals to annexes I and II to the AGTC Agreement. The objective of these proposals is to align the AGTC network to that contained in the AGC Agreement and to include therein, in particular, Euro-Asian transport links.

5. In line with the structure of the AGTC Agreement and with a view to facilitating a review of its network and its related installations, these proposals are presented, apart from those of a general nature, on a “country by country” basis.

6. In order to show the relationship of these proposals with the overall AGTC network, the secretariat has compiled in Section C of this document a list of the relevant international AGTC lines. Also, countries “directly concerned” as stipulated in Article 15, paragraph 3 of the AGTC Agreement are indicated therein.

7. Information still missing or not yet confirmed and placed in square brackets would need to be communicated to the secretariat by the competent authorities of the countries

\(^2\) The updated version of annex 1 to the AGC Agreement containing the list of railway lines of major international importance is contained in document TRANS/SC.2/2004/10.
concerned before these amendment proposals could formally be adopted by the Working Party, possibly at the present session. If such information is not forthcoming, the concerned amendment proposal may not be adopted by the Working Party.

8. In accordance with Article 15, paragraph 2 of the AGTC Agreement, the Working Party may wish to consider and review the amendment proposals below as compiled by the secretariat for adoption.

I. General amendment proposals

AGTC Annex I

Delete all references and lines related to “(19) Yugoslavia”.

Modify the numbering system for countries included in Annex I to the AGTC as follows [Purpose: alignment with AGC Agreement]:

“(17) Czech Republic (21) Croatia
(18) Slovakia (22) Bosnia and Herzegovina
(19) Hungary (23) Serbia and Montenegro
(20) Slovenia

3 Railway lines and related installations placed in square brackets still need to be confirmed.
4 Numbering of railway lines of importance for international combined transport in the AGTC Agreement has been made in accordance with the AGC Agreement (Reference: TRANS/SC.2/2004/10) as follows:
   1. Principal lines, comprising reference lines and intermediate lines, called class-A lines, have two-digit numbers; supplementary lines, called class-B lines, have three-digit numbers.
   2. North-south oriented reference lines have two-digit odd numbers ending in 5 and increasing from west to east. West-east oriented reference lines have two-digit even numbers ending in 0 and increasing from north to south. Intermediate lines have respectively two-digit odd and two-digit even numbers falling within the numbers of the reference lines between which they are located.
   3. Class-B lines have three-digit numbers, the first digit being that of the nearest reference line to the north of the B-line concerned, the second being that of the nearest reference line to the west of the B-line concerned and the third being a serial number.
II. Country specific amendment proposals

(1) PORTUGAL

AGTC Annex II

Replace the existing list of terminals by the following:

“Alcântara (Lisboa)
Leixões
Lisboa-Bobadela”

---

5 General note and explanation of line numbers
"C-E" denotes railway lines essentially identical to relevant E lines of the European Agreement on Main International Railway Lines (AGC) of 1985.
"C" denotes other lines important for international combined transport. "C" line numbers are identical to those of the nearest E line and are sometimes followed by a serial number.
The E number has been placed for easy reference and comparison with the lines contained in the AGC. It in no way indicates whether States are or intend to become Contracting Parties to the AGC.
Symbols employed
(        ) = Station outside country concerned [for instance: (Hendaye-)].
            = Alternative routes [for instance:        Avila
                             Aranda de Duero]
------- = Section of an AGC line important for international combined transport (concerns only C-E lines).
......... = Section of line important for combined transport, but not part of the relevant AGC line (only C-E lines).

C. AGTC LINES RELATED TO THE AMENDMENT PROPOSALS

This section provides a description of the AGTC lines that are related to the above amendment proposals. It also indicates the countries that are directly concerned in accordance with article 15, paragraph 3 of the AGTC Agreement. Sections of lines that are substantially affected by the amendment proposals described above (i.e. change of routes, etc.) are printed in bold font.

The numbering of railway lines of importance for international combined transport in the AGTC Agreement has been made in accordance with the AGC Agreement (Reference: TRANS/SC.2/2004/10) as follows:

1. Principal lines, comprising reference lines and intermediate lines, called class-A lines, have two-digit numbers; supplementary lines, called class-B lines, have three-digit numbers.

2. North-south oriented reference lines have two-digit odd numbers ending in 5 and increasing from west to east. West-east oriented reference lines have two-digit even numbers ending in 0 and increasing from north to south. Intermediate lines have respectively two-digit odd and two-digit even numbers falling within the numbers of the reference lines between which they are located.

3. Class-B lines have three-digit numbers, the first digit being that of the nearest reference line to the north of the B-line concerned, the second being that of the nearest reference line to the west of the B-line concerned and the third being a serial number.
